Windows Registry (LUA) bug. The kernel, device drivers, services, Security Accounts Manager, and user interfaces can all use the registry. Esposito, Dino (November 2000). MSDN Magazine The Windows Registry is a hierarchical database that stores low-level settings for the Microsoft Windows operating system and for applications that opt to use the registry. "Windows 2000 Registry: Latest Features and APIs Provide the Power to Customize and Extend Your Apps". The registry also allows access to counters for profiling system performance 7f4c3b90cf

Series 40 It was at one point the world's most widely used mobile phone platform and found in hundreds of millions of mobile phones. them by not supporting true multi-tasking and do not have a native code API for third parties and thus

do not support installable applications other than Nokia Series 40 Platform, often shortened as S40, is a software platform and application user interface (UI) software that was previously used on Nokia's broad range of mid-tier feature phones from 2002 to 2014, as well as on some of the Vertu line of luxury phones.

S60 (software platform) S60 consists of a suite of libraries and standard applications. The S60 Platform, originally named Series 60 User Interface, is a discontinued software platform and graphical user interface for smartphones that runs on top of the Symbian operating system. It supports application development in Java MIDP, C++, Python and Adobe Flash. Its API was called Avkon UI. S60 was introduced at COMDEX in November 2001 and first shipped with the Nokia 7650 smartphone; the original version was followed by three other major releases. It was created by Nokia based on the 'Pearl' interface from Symbian Ltd.

Series 40 was more advanced than Nokia's Series 30. It was not however used for smartphones (where Nokia used Symbian at the time, and later Windows Phone) and differentiates from them by not supporting true multi-tasking and do not have a native code API for third parties and thus do not support installable applications other than (with few exceptions) MIDlets that are written in Java. However, the simplicity...

Nokia C2-02 This phone is also known as Nokia C2-02 Touch and Type. "The latest Nokia phones and accessories | Nokia The Nokia C2-02 is smartphone handset produced by Nokia. MIDP Java 2. 1 with additional Java APIs. This is one of the first mobile phones released by Nokia that possesses a touchscreen in a "slider" form factor (the other one being Nokia C2-03 body which is a dual-SIM variant). "Nokia announces "new era" with four new phones";. 5 June 2012

Third-generation GCN chips are produced on a 28 nm CMOS process. Polaris (fourth-generation GCN) chips (except for Polaris 30) are produced on a 14 nm FinFET process, developed by Samsung Electronics and licensed to GlobalFoundries. Polaris 30 chips are produced on a 12 nm FinFET process, developed by Samsung and GlobalFoundries.
