The main objective behind this field of study is to understand the individual within the larger social and political aspects of society. Feminist economics is oriented toward the social ecology of money. Other feminist scholars have engaged in new forms of data collection and measurement such as the Gender Empowerment Measure (GEM), and more gender-aware theories such as the capabilities approach. Much feminist economic research focuses on topics that have been neglected in the field, such as care work, intimate partner violence, or on economic theories which could be improved through better incorporation of gendered effects and interactions, such as between paid and unpaid sectors of economies. By the 1790s, the leading feminist voice in both the U.K. and U.S. was Mary Wollstonecraft, whose A Vindication of the Rights of Woman (1792) was influenced by the lesser-known American Judith Sargent Murray. The history of the fat acceptance movement can be dated back to 1967 when 500 people met in New York's Central Park to protest against anti-fat bias. Sociologist Charlotte Cooper has argued that the history of the fat activist movement is best understood in waves, similar to the feminist movement, with which she believes it is closely tied. Cooper believes that fat activists have suffered similar waves of activism followed by burnout, with activists in the following wave often unaware of the history of the movement... a63f59512f Feminist economists call attention to the social constructions of traditional economics, questioning the extent to which it is positive and objective, and showing how its models and methods are biased by an exclusive attention to masculine-associated topics and a one-sided favoring of masculine-associated assumptions and methods. The historical philosophical views of what beauty, the arts, and sensory experiences are, relate to the idea of aesthetics. Aesthetics looks at styles of production. In particular, feminists argue that despite seeming neutral or inclusive, the way people think about art and aesthetics is

influenced by gender roles. Feminist aesthetics is a tool for analyzing how art is understood using gendered issues. A person's gender identity affects the ways in which they perceive art and aesthetics because of their subject position and that perception is influenced by power. The ways in which people see art is also influenced by social values such as class and race. One's subject position in life changes the way art is perceived because of people's different knowledge's about life and experiences. In the way that feminist history unsettles traditional history, feminist aesthetics challenge...

The Slags' eating frequently follows a night of binge drinking, and the circumstances of the sex or the partner in question are rarely an issue – they have been known to leap on delivery men or workmen for gratification, with the targeted man rarely given an opportunity to resist or escape. Both slags regularly enjoy carnal relations with Baz (full name Barrington Askwith, seemingly as a nod to the actor Robin Askwith), a local jobless dropout who divides his time between drinking, committing crime, and having sex with San and Tray. Baz's good-natured wife, Thelma Haystacks-Askwith (daughter of Horace Haystacks), often finds out that Baz is cheating on her...

Gender issues can be broken down into many different categories and can be rather controversial. They can include the way people identify their gender (for example: male, female, genderqueer; transgender or cisgender) and how they have been affected by societal structures relating to gender (gender hierarchy), the role of gender in the individual's life (such as stereotypical gender roles) and any other gender related issues.

Feminist theory often focuses on analyzing gender inequality. Themes often explored in feminist theory include discrimination, objectification (especially sexual objectification), oppression, patriarchy, stereotyping, art history and contemporary art, and aesthetics.

Fat feminism Fat feminists originated during third-wave feminism and is aligned with the fat acceptance movement. Fat feminists advocate body-positive acceptance for all bodies, regardless of their weight, as well as eliminating biases experienced directly or indirectly by fat people. This branch of feminism intersects misogyny and sexism with anti-fat bias. Fat feminism, often associated with "body-positivity", is a social movement that incorporates feminist themes of equality, social justice, and cultural analysis based on the weight of a woman or a non-binary feminine person. Contemporary western fat feminism works to dismantle oppressive power structures which disproportionately affect fat, queer, non-white, disabled, and other non-hegemonic bodies. A significant portion of body positivity in the third-wave focused on embracing and reclaiming femininity, such as wearing makeup and high heels, even though the second-wave fought against these things. It covers a wide range of topics such as diet culture, fat-phobia, representation in media, ableism, and employment discrimination
