Radiation effects from the Fukushima nuclear accident
Radioactive particles from the incident, including iodine-131
and caesium-134/137, have since been detected at
atmospheric radionuclide. This resulted in Japanese
authorities implementing a 30 km exclusion zone around the
power plant and the continued displacement of approximately
156,000 people as of early 2013. The release of radioactive
isotopes from reactor containment vessels was a result of
venting in order to reduce gaseous pressure, and the
discharge of coolant water into the sea. The number of
evacuees has declined to 49,492 as of March 2018. 5 April:
Fish caught 50 miles The radiation effects from the Fukushima
nuclear accident are the observed and predicted effects as a
result of the release of radioactive isotopes from the

Fukushima Daiichi Nuclear Power Plant following the 2011 Tōhoku earthquake and tsunami. 9,100 tons of water that was 100 times the contamination limit from a wastewater treatment plant, and dumping would take 6 days 7d15e40270

Israeli occupation of the West Bank The status of the West Bank as a militarily occupied territory has been affirmed by the International Court of Justice and, with the exception of East Jerusalem, by the Israeli Supreme Court. Considered to be a classic example of an "intractable conflict", Israel's occupation is now the longest in modern history. Of 121 settlements studied in 2007, 81 had wastewater facilities, many subject to breakdown, with sewage flowing into streams. The West Bank, including East Jerusalem, has been under military occupation by Israel since 7 June 1967, when Israeli forces captured the territory, then ruled by Jordan, during the Six-Day War. The West Bank, excepting East Jerusalem, is administered by the Israeli Civil Administration, a branch of the Israeli Ministry of Defense. strict environment laws apply. Though its occupation is illegal, Israel has cited several reasons for retaining the West Bank within its ambit: historic rights stemming from the Balfour 7d15e40270
