Building performance simulation (BPS) is the replication of aspects of building performance using a computer-based, mathematical model created on the basis of fundamental physical principles and sound engineering practice. Building performance simulation has various sub-domains; most prominent are thermal simulation, lighting simulation, acoustical simulation and air flow simulation. 8 (2): 39–43. Building performance simulation itself is a field within the wider realm of scientific computing. Most building performance simulation is based on the use of bespoke simulation software 79bb9bed2f
