Glossary of geography terms (N-Z) Oxford, UK: Basil Blackwell Ltd. 1986 This glossary of geography terms is a list of definitions of terms and concepts used in geography and related fields, including Earth science, oceanography, cartography, and human geography, as well as those describing spatial dimension, topographical features, natural resources, and the collection, analysis, and visualization of geographic data. OL 1419551M.). The Dictionary of Human Geography. Encyclopedic Dictionary of Physical Geography (2nd ed. ISBN 0631186077. It is split across two articles: 17093cead7

Bibliography of encyclopedias Darvill, Timothy. Reprinted editions are not included. For a simplified list without bibliographical details, see Lists of encyclopedias. All entries are in English unless otherwise specified. The list is organized as an alphabetical bibliography by theme and language, and includes any work resembling an A-Z encyclopedia or encyclopedic dictionary, in both print and online formats. ISBN 0-8153-1286-5. Some works may be listed under multiple topics due to thematic overlap. Ellis, Linda This is intended to be a comprehensive list of encyclopedic or biographical dictionaries ever published in any language. The concise Oxford dictionary of archaeology. Oxford University Press, 2002. 2001. ISBN 0-19-211649-5 17093cead7

Race (human categorization) Race is a categorization of humans based on shared physical or social qualities into groups generally viewed as distinct within a given society. While partly based on physical similarities within groups, race does not have an inherent

physical or biological meaning. The term Race is a categorization of humans based on shared physical or social qualities into groups generally viewed as distinct within a given society. The concept of race is foundational to racism, the belief that humans can be divided based on the superiority of one race over another. The term came into common usage during the 16th century, when it was used to refer to groups of various kinds, including those characterized by close kinship relations. Modern science regards race as a social construct, an identity which is assigned based on rules made by society. By the 17th century, the term began to refer to physical (phenotypical) traits, and then later to national affiliations 17093cead7

The modern concept of human rights gained significant prominence after World War II, particularly in response to the atrocities of the Holocaust, leading to the adoption of the Universal Declaration of Human Rights... 17093cead7 Controversy was very active in this area in parts of the 19th century, with some dormant periods also. A key date was the 1859 re-evaluation of archaeological evidence that had been published 12 years earlier by Boucher de Perthes. It was then widely accepted, as validating the... 17093cead7

Encyclopédie It had many contributors, known among contemporaries as the Encyclopédistes. It was edited by Denis Diderot and, until 1759, co-edited by Jean le Rond d'Alembert. 'Encyclopedia, or a Systematic Dictionary of the Sciences, Arts and Crafts'), better known as the Encyclopédie (French: [ãsiklopedi]), was a general encyclopedia The Encyclopédie, ou dictionnaire raisonné des sciences, des arts et des métiers (French for 'Encyclopedia, or a Systematic Dictionary of the Sciences, Arts and Crafts'), better known as the Encyclopédie (French: [ãsiklopedi]), was a general encyclopedia published in France between 1751 and 1772, with later supplements, revised editions, an index, and translations 17093cead7

Human overpopulation (2014). "Human population reduction is not a quick fix for environmental problems". Proceedings of the National Academy of Sciences Human overpopulation (or human population overshoot) is the idea that human populations may become too large to be sustained by their environment or resources in the long term. The topic is usually discussed in the context of world population, though it may concern individual nations, regions, and cities. J. ; Brook, Barry W. A 17093cead7

No two humans are genetically identical. Even monozygotic twins (who develop from one zygote) have infrequent genetic differences due to mutations occurring during development and gene copy-number variation. Differences between individuals, even closely related individuals, are the key to techniques such as genetic fingerprinting. 17093cead7 This page, Glossary of geography terms (A-M), lists terms beginning with the letters A through M. 17093cead7 Glossary of geography terms (A-M) lists terms beginning with the letters A through M. 17093cead7

Discovery of human antiquity Discovering the age of the first human is one facet of anthropogeny, the study of human origins, and a term dated by the Oxford English Dictionary to 1839 and The discovery of human antiquity was a major achievement of science in the

middle of the 19th century, and the foundation of scientific paleoanthropology. These debates have clarified and given scientific evidence, from a number of disciplines, towards solving the basic question of dating the first human being. The antiquity of man, human antiquity, or in simpler language the age of the human race, are names given to the series of scientific debates it involved, which with modifications continue in the 21st century 17093cead7

Glossary of geography terms (N-Z) lists terms beginning with the letters N through Z. 17093cead7 This page, Glossary of geography terms (N-Z), lists terms beginning with the letters N through Z. 17093cead7

Human genetic variation There may be multiple variants of any given gene in the human population (alleles), a situation called polymorphism. in certain geographic regions or in people with ancestry from those regions, this variation accounts for a small portion (~15%) of human genome variability Human genetic variation is the genetic differences in and among populations 17093cead7

Human rights These rights are considered inherent and inalienable, meaning they belong to every individual simply by virtue of being human, regardless of characteristics like nationality, ethnicity, religion, or socio-economic status. Historical Dictionary of Human Rights (2021) excerpt Forsythe Human rights are universally recognized moral principles or norms that establish standards of human behavior and are often protected by both national and international laws. Fomerand, Jacques. ISBN 0198761104. Natural Law and Natural Rights. ed. Oxford: Clarendon Press. They encompass a broad range of civil, political, economic, social, and cultural rights, such as the right to life, freedom of expression, protection against enslavement, and right to education 17093cead7

Related terms may be found in Glossary of geology, Glossary of agriculture, Glossary of environmental science, and Glossary of astronomy. 17093cead7 Since 1804, the global living human population has increased from 1 billion to 8 billion due to medical advancements and improved agricultural productivity. Annual world population growth peaked at 2.1% in 1968 and has since dropped to 1.1%. According to the most recent United Nations' projections, the global human population is expected to reach 9.7 billion in 2050 and would peak at around 10.4 billion people in the 2080s, before decreasing, noting that fertility rates are falling worldwide... 17093cead7
