

Image Texture Feature Extraction Using Glcm Approach

Radiomics g. gray-level co-occurrence matrix (GLCM), run length matrix (RLM), size zone matrix (SZM) In the field of medicine, radiomics is a method that extracts a large number of features from medical images using data-characterisation algorithms. histogram, descriptors of the relationships between image voxels (e. However, the technique can be applied to any medical study where a pathological process can be imaged. Radiomics emerged from the medical fields of radiology and oncology and is the most advanced in applications within these fields. The hypothesis of radiomics is that the distinctive imaging features between disease forms may be useful for predicting prognosis and therapeutic response for various cancer types, thus providing valuable information for personalized therapy. These features, termed radiomic features, have the potential to uncover tumoral patterns and characteristics that fail to be appreciated by the naked eye f8c3a752ee
