Foreign Legion (band) later Dead On Arrival. Following the name change to Foreign Legion (due partly to people Foreign Legion is a punk band from South Wales. Dead on Arrival had one song on 1984's Bullshead Detector album

Light-emitting diode It was also demonstrated that the detector could be operated A light-emitting diode (LED) is a semiconductor device that emits light when current flows through it. Electrons in the semiconductor recombine with electron holes, releasing energy in the form of photons. The TAC-BIO detector's response time was one minute from when it sensed a biological agent. The color of the light (corresponding to the energy of the photons) is determined by the energy required for electrons to cross the band gap of the semiconductor. White light is obtained by using multiple semiconductors or a layer of light-emitting phosphor on the semiconductor device

Notable historic attractions in the town are Wenlock Priory, Wenlock Edge, Holy Trinity Church and the Guildhall. The Wenlock Olympian Games, established by William Penny Brookes in 1850, are centred in the town. Brookes is credited as a founding father of... Custer's orders were to destroy a railroad bridge across the Rivanna River. His only opposition came from Confederate Maj. Gen. J.E.B. Stuart's "Horse Company" stationed in a camp near the Rivanna River at Carrsbrook. Custer's men raided the camp under fire from Confederate forces commanded by Capt. R. Preston Chew and Captain Marcellus N. Moorman. The...

AKB48 K. This "Idols You Can Meet" concept includes teams which can rotate performances and perform simultaneously at several events and "handshake" events, where fans can meet group members. Akimoto has expanded the AKB48 concept to several girl groups within Japan, and internationally in Mainland

China, Indonesia, Thailand, Taiwan. AKB48 has sold more records than any other female musical act in Japanese history. B. Forty-Eight) is a Japanese idol musical girl group named after the Akihabara area in Tokyo, where the group's theater is located. AKB48's producer, Yasushi Akimoto, wanted to form a girl group with its own theater and performing daily so fans could always see them live (which is not the case with usual pop groups giving occasional concerts and seen on television). suspend their theater performances, they introduced security measures: metal detectors, not using the theaters' front rows, suspending post-performance "high-five"; AKB48 (pronounced A

In the early afternoon of February 28, 1864, Union Brig. Gen. George A. Custer and 1,500 Union soldiers advanced towards Charlottesville. This raid was an attempt by the Union to divert attention toward Charlottesville while a separate attempt was made to free prisoners of war being held in Richmond.

Battle of Rio Hill but were limited, often carried out solely by curious locals with metal detectors. In 1988, a shopping center was built on the precise location of the The Battle of Rio Hill was a skirmish in the American Civil War in which Union cavalry raided a Confederate camp in Albemarle County, Virginia

List of fictional aircraft The aircraft in this list are generally intended to operate in an atmosphere, though a few have been stated as being capable of exoatmospheric or sub-orbital flight as well. Adolf Wolf in Blitz Wolf. It is detected by the pigs using their listening detector, and is promptly shot down by their huge, multi-cannon gun, simply named This is a list of fictional aircraft, including fixed-wing aircraft, rotary wing aircraft, and lighter-than-air craft

Much Wenlock 6 km) north of the town), Wyke (2 miles (3 km) north-east), Atterley (2 miles (3 km) south-east), Stretton Westwood (2 miles (3 km) south-west) and Bourton (3 miles (5 km) south-west). "Detectorist with faulty gear finds "England's largest"; Much Wenlock is a market town and parish in Shropshire, England; it is situated on

the A458 road between Shrewsbury and Bridgnorth. "England's largest gold nugget found in Shropshire with faulty metal detector". The population of the civil parish, according to the 2001 Census, was 2,605, increasing to 2,877 by 2011. The civil parish includes the villages of Homer (1 mile (1. 2024). The Guardian. Nearby, to the north-east, is the Ironbridge Gorge and Telford

Appearing as practical electronic components in 1962, the earliest LEDs emitted low-intensity infrared (IR) light. Infrared LEDs are used in remote-control circuits, such as those used with a wide variety of consumer electronics. The first visible-light LEDs were of low intensity and limited to red. The band went on hiatus in 2006, for... Crass spray-painted stencilled graffiti messages on the London Underground and on advertising-billboards, coordinated squats and organized political action. The band expressed its ideals by dressing in black, military-surplus-style clothing and using a stage backdrop amalgamating icons of perceived authority such as the Christian cross, the swastika, the Union Jack, and the... First produced in 1968, TOW is one of the most widely used anti-tank guided missiles. It can be found in a wide variety of manually carried and vehicle-mounted forms, as well as widespread use on helicopters. Originally designed by Hughes Aircraft in the 1960s, the weapon is currently produced by RTX. Rundkvist has studied and excavated various sites in Sweden, particularly in the country's south. In 2003 and 2004, he published a three-volume work which doubled as his PhD dissertation, cataloguing the finds from Barshalder, the largest prehistoric cemetery on the Swedish island of Gotland. A subsequent book identified nine possible regional power centres in Östergötland, and attempted to determine where the "Beowulfian mead halls" of the day once stood. Excavating years later at one of these sites, Aska, Rundkvist uncovered the...

On Thorns I Lay gothic metal band founded in Athens in 1992. The group has gone through different stylistic facets throughout its career, starting with death metal in their early days, then transitioning to a blackened death-doom symphonic style with their first EP, and later embracing atmospheric doom-

death in their early albums and later gothic metal with their subsequent albums. The group has gone through different stylistic facets throughout its career, starting with death metal in their *On Thorns I Lay* is a Greek death-doom and gothic metal band founded in Athens in 1992. *On Thorns I Lay* is among the bands of the first major gothic doom wave that systematized the principle of contrasting vocals known as the "beauty and the beast" style that became popular in the late 1990s. Towards the end of the first part of their career in the early 2000s, they shifted towards a more stripped-down and introspective rock-metal style

These aircraft appear in notable works of fiction, including novels, stories, films, TV series, animation, video games, comics, and other works. They are either the subject of the work or an important element.

Martin Rundkvist His research focuses on the Bronze, Iron, and Middle Ages of Scandinavia, including significant excavations in the province of Östergötland. Metal detector Martin Rundkvist (born 4 April 1972) is a Swedish archaeologist and associate professor at the University of Łódź in Poland. 2021a). Metal detector survey of the West Cemeteries, Aska in Hagebyhöga, Östergötland (Report). ——— & Koskinen, Julia Schulte (26 January 2021b)

Crass The Guardian. Sleeve note on *Bullshit Detector* Volume 1 (Crass Records, cat no. 2001). 421984/4): "Sometime in 1977 Rimbaud and Crass was an English art collective and punk rock band formed in Epping, Essex, in 1977 who promoted anarchism as a political ideology, a lifestyle, and a resistance movement. Crass popularized the anarcho-punk movement of the punk subculture, advocating direct action, animal rights, feminism, anti-fascism, and environmentalism. "Country house anarchy". The band employed and advocated a DIY ethic in its albums, sound collages, leaflets, and films

Early LEDs...

BGM-71 TOW 10 and ENTAC, offering roughly twice the effective range, a more powerful warhead, and a greatly

improved semi-automatic command to line of sight (SACLOS) that could also be equipped with infrared cameras for night time use. TOW replaced much smaller missiles like the SS. The IR detector was placed at the end of a vertical V-shaped channel in the launcher. this constantly changed relative to the missile body as it spun. As The BGM-71 TOW ("Tube-launched, Optically tracked, Wire-guided", pronounced) is an American anti-tank missile 505a2cfee8
