History of radar com. This possibility was suggested in James Clerk Maxwell's seminal work on electromagnetism. Archived from the original on 25 April 2018. ISBN 9781119490739. True radar which provided directional and ranging information, such as the British Chain Home early warning system, was developed over the next two decades. However, it was not until the early 20th century that systems able to use these principles were becoming widely available, and it was German inventor Christian Hülsmeyer who first used them to build a simple ship detection device intended to help avoid collisions in fog (Reichspatent Nr. 165546 in 1904). Retrieved 25 April 2018 The history of radar (where radar stands for radio detection and ranging) started with experiments by Heinrich Hertz in the late 19th century that showed that radio waves were reflected by metallic objects. marconiradarhistory. "Marconi Radar History / Franklin and Round". pbworks ff2da33274
