73 7cae72049a 80 7cae72049a 66 7cae72049a 156 7cae72049a A neural network consists of connected units or nodes called artificial neurons, which loosely model the neurons in the brain. Artificial neuron models that mimic biological neurons more closely have also been recently investigated and shown to significantly improve performance. These are connected by edges, which model the synapses in the brain. Each artificial neuron receives signals from connected neurons, then processes them and sends a signal to other connected neurons. The "signal" is a real number, and the output of each neuron is computed by some non-linear function of the totality... 7cae72049a 128 7cae72049a 25 7cae72049a

Boole was the son of a shoemaker. He received a
primary school education and learned Latin and modern
languages through various means. At 16, he began
teaching to support his family. He established his own
school at 19 and later ran a boarding school in Lincoln.

Boole was an active member of local societies...
