Intelligence analysis the precise answer. The best use of information, in this context, is to challenge the assumption the analyst likes best. Although its practice is found in its purest form inside national intelligence agencies, its methods are also applicable in fields such as business intelligence or competitive intelligence. One of the key motivations for Intelligence analysis is the application of individual and collective cognitive methods to weigh data and

test hypotheses within a secret socio-cultural context. The descriptions are drawn from what may only be available in the form of deliberately deceptive information; the analyst must correlate the similarities among deceptions and extract a common truth cd7db79ea2
