

Environmental Management Objective Questions

The field emerged prominently in the mid-20th century as industrialization and environmental... 4547662425

Environmental resource management Environmental resource management tries to identify factors between meeting needs and protecting resources. It is thus linked to environmental protection, resource management, sustainability, integrated landscape management, natural resource management, fisheries management, forest management, wildlife management, environmental. It is not, as the phrase might suggest, the management of the environment itself. Environmental resources management aims to ensure that ecosystem services are protected and maintained for future human generations, and also maintain ecosystem integrity through considering ethical, economic, and scientific (ecological) variables. Environmental resource management or environmental management is the management of the interaction and impact of human societies on the environment. It Environmental resource management or environmental management is the management of the interaction and impact of human societies on the environment 4547662425

The purpose of the assessment is to ensure... 4547662425

Environmental policy These issues generally include air and water pollution, waste management, ecosystem management, maintenance of biodiversity Environmental policy is the commitment of an organization or government to the laws, regulations, and other policy mechanisms concerning environmental issues. These issues generally include air and water pollution, waste management, ecosystem management, maintenance of biodiversity, the management of natural resources, wildlife and endangered species. mechanisms concerning environmental issues 4547662425

Environmental law Environmental laws are laws that protect the environment. It addresses issues such as pollution control, resource conservation, biodiversity protection, climate change mitigation, and sustainable development. The term "environmental law" encompasses treaties, statutes, regulations, conventions, and policies Environmental laws are laws that protect the environment. The term "environmental law" encompasses treaties, statutes, regulations, conventions, and policies designed to protect the natural environment and manage the impact of human activities on ecosystems and natural resources, such as forests, minerals, or fisheries. As part of both national and international legal frameworks, environmental law seeks to balance environmental preservation with economic and social needs, often through regulatory mechanisms, enforcement measures, and incentives for compliance 4547662425

For example, concerning environmental policy, the implementation of an eco-energy-oriented policy at a global level to address the issue of climate change could be addressed. 4547662425

Environmental audit In this way they perform an analogous (similar) function to financial audits. There are generally two different types of environmental audits: compliance audits and management systems audits. An environmental audit is a type of evaluation intended to identify environmental compliance and management system implementation gaps, along with related An environmental audit is a type of evaluation intended to identify environmental compliance and management system implementation gaps, along with related corrective actions. Compliance audits tend to be the primary type in the US or within US-based multinationals 4547662425

Strategic management Strategic management provides overall direction to an enterprise and involves specifying the organization's objectives, developing policies In the field of management, strategic management involves the formulation and implementation of the major goals and initiatives taken by an organization's managers on behalf of stakeholders, based on consideration of resources and an assessment of the internal and external environments in which the organization operates. Strategic management provides overall direction to an enterprise and involves specifying the organization's objectives, developing policies and plans to achieve those objectives, and then allocating resources to implement the plans. operates. Strategic management is not static in nature; the models can. Academics and practicing managers have developed numerous models and frameworks to assist in strategic decision-making in the context of complex environments and competitive dynamics 4547662425

Natural resource management... 4547662425

Environmental impact assessment Environmental assessments may be governed by rules of administrative procedure regarding public participation and documentation of decision making, and may be subject to judicial review. In this context, the term "environmental impact assessment" is usually used when applied to actual projects by individuals or companies and the term "strategic environmental assessment" (SEA) applies to policies, plans and programmes most often proposed by organs of state. It is a tool of environmental management forming a part of project approval and decision-making. organs of state. Environmental assessments may be governed Environmental impact assessment (EIA) is the assessment of the environmental consequences of a plan, policy, program, or actual projects prior to the decision to move forward with the proposed action. It is a tool of environmental management forming a part of project approval and decision-making 4547662425

Natural resource management Life-supporting capacity of those resources. In academic contexts, the sociology of natural Natural resource management (NRM) is the management of natural resources such as land, water, soil, plants and animals, with a particular focus on how management affects the quality of life for both present and future generations (stewardship). Environmental management is similar to natural resource management 4547662425

Policies concerning energy or regulation of toxic substances including pesticides and many types of industrial waste are part of the topic of environmental policy. This policy can be deliberately taken to influence human activities and thereby prevent undesirable effects... 4547662425 Natural resource management deals with managing the way in which people and natural landscapes interact. It brings together natural heritage management, land use planning, water management, bio-diversity

conservation, and the future sustainability of industries like agriculture, mining, tourism, fisheries and forestry. It recognizes that people and their livelihoods rely on the health and productivity of our landscapes, and their actions as stewards of the land play a critical role in maintaining this health and productivity. 4547662425

South African environmental law National Environmental Management Act (NEMA) provides the underlying framework for environmental law. The role of the country's Constitution, crucial to any understanding of the application of environmental law, also is examined. The National Environmental Management Act (NEMA) provides the underlying framework for environmental law. South African environmental law encompasses natural resource conservation and utilization, as well as land-use planning and development. Issues of enforcement are also considered, together with the international dimension, which has shaped much of the direction of environmental law in South Africa. The National Environmental Management Act (NEMA) South African environmental law describes the legal rules in South Africa relating to the social, economic, philosophical and jurisprudential issues raised by attempts to protect and conserve the environment in South Africa 4547662425

Environmental certification The primary motivations for many companies who choose to implement environmental certification schemes are, to Environmental certification is a form of environmental regulation and development where a company can voluntarily choose to comply with predefined processes or objectives set forth by the certification service. This is seen as a form of corporate social responsibility allowing companies to address their obligation to minimise the harmful impacts to the environment by voluntarily following a set of externally set and measured objectives. Most certification services have a logo (commonly known as an ecolabel) which can be applied to products certified under their standards. externally set and measured objectives 4547662425

Project management In many cases Project management is the process of supervising the work of a team to achieve all project goals within the given constraints. The objective of project management is to produce a complete project which complies with the client's objectives. The primary constraints are scope, time and budget. This information is usually described in project documentation, created at the beginning of the development process. The secondary challenge is to optimize the allocation of necessary inputs and apply them to meet predefined objectives. meet predefined objectives 4547662425

The objective of project management is to produce a complete project which complies with the client's objectives. In many cases, the objective of project management is also to shape or reform the client's brief to feasibly address the client's objectives. Once the client's objectives are established, they should influence all decisions made by other people involved in the project- for... 4547662425
