

# Introduction To Openshift Red Hat

In addition to certification obtained by taking courses and/or... 9ae63d2c25 Vendor-sponsored credentials (e.g. Microsoft, Cisco) 9ae63d2c25

Amazon Elastic Compute Cloud EC2 encourages scalable deployment of applications by providing a web service through which a user can boot an Amazon Machine Image (AMI) to configure a virtual machine, which Amazon calls an "instance", containing any software desired. A user can create, launch, and terminate server-instances as needed, paying by the second for active servers – hence the term "elastic". EC2 provides users with control over the geographical location of instances that allows for latency optimization and high levels of redundancy. Platform GreenCloud Internap Linode Lunacloud Microsoft Azure Nimbula OpenShift Oracle Cloud OrionVM OVHcloud Rackspace Cloud RightScale Savvis TurnKey Amazon Elastic Compute Cloud (EC2) is a part of Amazon's cloud-computing platform, Amazon Web Services (AWS), that allows users to rent virtual computers on which to run their own computer applications. In November 2010, Amazon switched its own retail website platform to EC2 and AWS 9ae63d2c25

Governmental (or quasi-governmental) licenses, certifications, and credentials 9ae63d2c25

Netezza [citation needed] In 2019, after acquiring Red Hat, IBM established Cloud Pak offerings based on OpenShift, and revived Netezza as Netezza Performance IBM Netezza (pronounced ne-teez-a) is a subsidiary of American technology company IBM that designs and markets high-performance data warehouse appliances and advanced analytics applications for the most demanding analytic uses including enterprise data warehousing, business intelligence, predictive analytics and business continuity planning 9ae63d2c25

New versions of the .NET platform are released annually, typically in November. As of May 2025, the most recent version of .NET is .NET 9, released in November 2024, while the current long-term support (LTS) version is .NET 8, released in November 2023 and scheduled to receive updates until November 2026. 9ae63d2c25 OpenStack began in 2010 as a joint project of Rackspace Hosting and NASA. As of 2012, it was managed by the OpenStack Foundation, a non-profit corporate entity established in September 2012 to promote OpenStack software and its community. By 2018, more than 500 companies had joined... 9ae63d2c25

Docker (software) &quot;DotCloud Pivots And Wins Big With Docker, The Cloud Service Now Part Of Red Hat OpenShift&quot;. It was first released in 2013 and is developed by Docker, Inc. May 6, 2017. The software that hosts the containers is called Docker Engine. The service has both free and premium tiers. TechCrunch. Docker – Welcome to Collabnix&quot;. September Docker is a set of platform as a service (PaaS) products that use OS-level virtualization to deliver software in packages called containers 9ae63d2c25

.NET NET 7 now available for RHEL and OpenShift&quot;. Archived from the original on March 18, 2025. It is a cross-platform successor to the .NET platform (pronounced as "dot net"; formerly named. Red Hat Developer. The project is mainly developed by Microsoft employees by way of the .NET Core) is a free and open-source, managed computer software framework for Windows, Linux, and macOS operating systems. &quot;. NET Framework. Retrieved The. Clingan, John (November 8, 2022). .NET Foundation and is today released under an MIT License 9ae63d2c25

SAS Viya The software is available on Amazon AWS Marketplace, Google Cloud, Red Hat OpenShift, and on Microsoft Azure Marketplace under a pay-as-you-use model. SAS Viya is an artificial intelligence, analytics and data management platform developed by SAS Institute 9ae63d2c25

Docker is a tool that is used to automate the deployment of applications in lightweight containers so that applications can work efficiently in different environments in isolation. 9ae63d2c25

OpenStack The software platform consists of interrelated components that control diverse, multi-vendor hardware pools of processing, storage, and networking resources throughout a data center. Users manage it either through a web-based dashboard, through command-line tools, or through RESTful web services. OpenStack Releases OpenStack is a free, open standard cloud computing platform. open-source software portal Cloud Foundry Cloud-computing comparison OpenShift Private cloud computing infrastructure &quot;2024. 1 Caracal&quot;. It is mostly deployed as infrastructure-as-a-service (IaaS) in both public and private clouds where virtual servers and other resources are made available to users 9ae63d2c25

IOWN Global Forum 2023-02-16. It focuses on collaboration within its multiple committees and working groups to create Proof of Reference (PoC) documents as well as white papers, use cases, and fact sheets on the advancement of communication infrastructure. It has plans to achieve lower power consumption, higher transmission capacity and lower latency in its technology by 2030 as part of its Vision 2030 goals. &quot;RedHat OpenShift and data-centric infrastructure initiatives in IOWN Global Forum Red Hat&quot;. Archived from the original - The IOWN Global Forum is a trade association that develops technical standards for an all-photonics telecommunications network. Retrieved 2023-02-16 9ae63d2c25

List of computer security certifications Juniper Microsoft Kali OpenText Palo Alto Red Hat Symantec (since 2012 NortonLifeLock) Microsoft 1 year \*: you have to do a free refresh exam within 180 days In the computer security or Information security fields, there are a number of tracks a professional can take to demonstrate qualifications. Four sources categorizing these, and many other credentials, licenses, and certifications, are:

Association- and organization-sponsored credentials

Kubernetes Originally designed by Google, the project is now maintained by a worldwide community of contributors, and the trademark is held by the Cloud Native Computing Foundation. offering a managed Kubernetes service, GKE, and Red Hat was supporting Kubernetes as part of OpenShift since the inception of the Kubernetes project in Kubernetes (), also known as K8s is an open-source container orchestration system for automating software deployment, scaling, and management

Schools and universities Kubernetes assembles one or more computers, either virtual machines or bare metal, into a cluster which can run workloads in containers. It works with various container runtimes, such as containerd and CRI-O. Its suitability for running and managing workloads of... The name "Kubernetes" originates from the Greek: κυβερνήτης, romanized: kubernētēs (governor, helmsman, pilot). "Kubernetes" is often abbreviated as "K8s", counting the eight letters between the "K" and the "s" (a numeronym). Quality and acceptance vary worldwide for IT security credentials, from well-known and high-quality examples like a master's degree in the field from an accredited school, CISSP, and Microsoft certification, to a controversial list of many dozens of lesser-known credentials and organizations. Netezza was acquired by IBM on September 20, 2010. IBM released 4 generations of Netezza Appliances (Twinfin, Striper, Mako) where it was later reintroduced in June 2019 as a fourth generation NPS, Netezza Performance Server, part of the IBM CloudPak for Data offering (Hammerhead).

Eclipse Che Each machine may have varying technologies installed and is managed by Docker. The workspace server comes with a flexible RESTful webservice. Eclipse Che is an Eclipse Cloud Development (ECD) top-level project, allowing contributions from the user community. It also contains a SDK for creating plug-ins for languages, frameworks or tools. It includes a multi-user remote development platform. machines which are used to execute projects. OpenShift Infrastructure Support: Eclipse Che is an open-source, Java-based developer workspace server and online IDE (integrated development environment)
