Jerome Bruner is often credited with originating discovery learning in the 1960s, but his ideas are very similar to those of earlier writers such as John Dewey. Bruner argues that "Practice in discovering for oneself teaches one to acquire information in a way that makes that information more readily viable in problem solving". This philosophy later became the discovery learning movement of the 1960s. The mantra of this philosophical movement suggests that... c2b308d552

He served as the last bishop of the Unity of the Brethren (direct predecessor of the Moravian Church) before becoming a religious refugee and one of the earliest champions of universal education, a concept eventually set forth in his book *Didactica Magna*. As an educator and theologian, he led schools and advised governments across Protestant Europe through the middle of the seventeenth century c2b308d552

Physics education Historically, physics has been taught at the high school and college level primarily by the lecture method together with laboratory exercises aimed at verifying concepts taught in the lectures. Aristotle's ideas were taught unchanged until the Late Middle Physics education or physics teaching refers to the education methods currently used to teach physics. By trial and error they learn. Students who participate in active learning for example with hands-on experiments learn through self-discovery. These concepts are better understood when lectures are accompanied with demonstration, hand-on experiments, and questions that require students to ponder what will happen in an experiment and why. Physics education research refers to an area of pedagogical research that seeks to improve those methods. The occupation is called physics educator or physics teacher. In Ancient Greece, Aristotle wrote what is considered now as the first textbook of physics c2b308d552
