

Implementing Oracle Integration Cloud Service

The company was founded in 1997 by Greg Gianforte in Bozeman, Montana as RightNow Technologies. Additional offices... bae6478a18 The geospatial feature of Oracle Spatial and Graph provides a SQL schema and functions that facilitate the storage, retrieval, update, and query of collections of spatial features in an Oracle database. (The spatial component of a spatial feature consists of the geometric representation of its shape in some coordinate... bae6478a18 a server running on a computer device, listening for requests at a particular port over a network, serving web documents (HTML, JSON, XML, images). bae6478a18 In practice, a web service commonly provides an object-oriented web-based interface to a database server, utilized for example by another web server, or by a mobile app, that provides a user interface to the end-user. Many organizations that provide data in formatted HTML pages will also provide that data on their server as XML or JSON, often through a Web service to allow syndication. Another application offered to the end-user may be a mashup, where a Web server consumes several Web services at different machines and compiles the content into one user interface. bae6478a18 The following is an alphabetical list of business models named in this way, including certain forms of cybercrime (criminal business models). bae6478a18 == History == bae6478a18 HP Public Cloud was announced on March 14, 2011, and launched as a public beta on May 10, 2012. HP Fellow and MySQL developer Brian Aker announced the Relational Database Service on stage at the 2012 MySQL User's Conference. The HP Public Cloud Beta that went live in May 2012 included OpenStack technology-based storage and content delivery network (CDN) components. HP Cloud Object Storage and HP Cloud CDN were moved into general availability on August 1, 2012. HP Cloud DNS as a Service was moved into general availability... bae6478a18

Cloud computing open-source cloud-software project, OpenStack. In Cloud computing is defined by the International Organization for Standardization (ISO) as "a paradigm for enabling network access to a scalable and elastic pool of shareable physical or virtual resources with self-service provisioning and administration on demand". It is commonly referred to as "the cloud". IBM introduced the IBM SmartCloud framework in 2011, and Oracle announced the Oracle Cloud in 2012 bae6478a18

RightNow Technologies 8 billion deal. "Oracle integrates CDP data in Fusion Cloud for better customer service" Oracle RightNow is an American customer relationship management (CRM) software service for enterprise organizations which is part of Oracle Service. It was originally developed by RightNow Technologies, Inc. service". , which was acquired by Oracle Corporation in 2011 in a \$1. Retrieved 2022-06-03. Anirban, Ghoshal (2022-05-12). VentureBeat bae6478a18

== Supported topics == bae6478a18 Message queues can be a good buffer to handle spiky workloads but they have a finite capacity. According to Gregor Hohpe, message queues require proper mechanisms (aka flow controls) to avoid filling the queue beyond its manageable capacity and to keep the system stable. bae6478a18

Oracle Spatial and Graph The graph features in Oracle Spatial and Graph include Oracle Network Data Model (NDM) graphs used in traditional network applications in major transportation, telcos, utilities and energy organizations and RDF semantic graphs used in social networks and social interactions and in linking disparate data sets to address requirements from the research, health sciences, finance, media and intelligence communities. The spatial features in Oracle Spatial and Graph aid users in managing geographic and location-data in a native type within an Oracle database, potentially supporting a wide range of applications — from automated mapping, facilities management, and geographic information systems (AM/FM/GIS), to wireless location services and location-enabled e-business. requirements with Oracle Label Security. Integration with open source Apache Jena and Sesame application development environments. Integration with XML-based Oracle Spatial and Graph, formerly Oracle Spatial, is a free option component of

the Oracle Database bae6478a18

In 2011, the National Institute of Standards and Technology (NIST) identified five "essential characteristics" for cloud systems. Below are the exact definitions according to NIST: bae6478a18 == Components == bae6478a18

List of acquisitions by Oracle "Oracle to Buy Cloud-Software Provider NetSuite This is a listing of Oracle Corporation's corporate acquisitions, including acquisitions of both companies and individual products. "Strategic Acquisitions". Greene, Jay (July 28, 2016). acquisitions (Sun was acquired by Oracle). Oracle Corporation bae6478a18

HP Converged Cloud was announced in April 2012. HP Converged Cloud is managed under a Hewlett-Packard business unit established in 2013 named The Converged Cloud unit, headed by Saar Gillai as Senior Vice President and general manager of Converged Cloud. bae6478a18 Oracle's version does not include value of the acquisition. bae6478a18

As a service The term XaaS can mean "anything as a service". Blockchain as a service (BaaS) is an enterprise-level software service that allows businesses to use cloud-based integration solutions to build, host "x as a service" (rendered as *aaS in acronyms) is a phrasal template for any business model in which a product use is offered as a subscription-based service rather than as an artifact owned and maintained by the customer. APIs. The converse of conducting or operating something "as a service" is doing the same using "on-premise" assets (such as on-premises software) or lump sum investments. Originating from the software-as-a-service concept that appeared in the 2010s with the advent of cloud computing, the template has expanded to numerous offerings in the field of information technology and beyond it bae6478a18

HP Cloud It was the combination of the previous HP Converged Cloud business unit HP Cloud was a set of cloud computing services available from Hewlett-Packard. It was marketed to enterprise organizations to combine public cloud services with internal IT resources to create hybrid clouds, or a mix of private and public cloud environments, from around 2011 to 2016. It was the combination of the previous HP Converged Cloud business unit and HP Cloud Services, an OpenStack-based public cloud. HP Cloud was a set of cloud computing services available from Hewlett-Packard bae6478a18

== Characteristics == bae6478a18 == Ordering Guarantees in Message Queues == bae6478a18 The main product offered by RightNow Technologies was RightNow CX, a customer experience suite. RightNow CX was divided into RightNow Web Experience, RightNow Social Experience, RightNow Contact Center Experience, and RightNow Engage. Under Oracle Service, the product has predictive capabilities and offers customer service support for website, apps, chatbot, live chat, video chat, co-browse, social messaging, texting, customer portals, IVR, knowledge base, store associates, and other channels. It is part of the Oracle Advertising and Customer Experience (CX) suite of products, which also includes Advertising, Marketing, and Sales cloud products. Oracle Service Cloud is FedRAMP authorized, which means it meets certain cybersecurity standards and is approved for use by federal agencies. bae6478a18 a service offered by an electronic device to another electronic device, communicating with each other via the Internet, or bae6478a18 OUM is applicable to any size or type of information technology project. While OUM is a plan-based method - that includes extensive overview material, task and artifact descriptions, and associated templates - the method is intended to be tailored to support the appropriate level of ceremony required for each project. Guidance is provided for identifying the minimum subset of tasks, tailoring the project approach, executing iterative and incremental project planning, and applying agile techniques. Supplemental guidance provides specific support for Oracle products, tools, and technologies. bae6478a18 See also Category:Sun Microsystems acquisitions (Sun was acquired by Oracle). bae6478a18 OUM v6.4.0 provides support for: bae6478a18 == B == bae6478a18 == General == bae6478a18 Amazon SQS FIFO and Azure Service Bus sessions are queue-based messaging systems that provide ordering guarantees within a message group or session attempt but do not necessarily guarantee ordered delivery in cases of retries or failures. In SQS FIFO, messages in the same message group are processed in order, with subsequent messages held until the preceding message is... bae6478a18 == History == bae6478a18

Web service 2013. Oracle Application Testing Suite Web Services Testing using Oracle Application Testing Suite Krill, Paul (2005-12-16) A web service (WS) is either:. 1109/MESOCA. ISBN 978-1-4673-4889-8. 6632734 bae6478a18

Oracle unified method for Oracle products, tools, and technologies. OUM is business-process and use-case driven and includes support for the Unified Modeling Language (UML), though the use of UML is not required. 0 provides support for: Application implementation Cloud application services implementation Software The Oracle unified method (OUM), first released by Oracle Corporation in 2006, is a standards-based method with roots in the unified process (UP). OUM v6. 4. OUM combines these standards with aspects of Oracle's legacy methods and Oracle implementation best-practices bae6478a18

Message queuing service The Java library implements the JMS A message queueing service is a message-oriented middleware or MOM deployed in a compute cloud using software as a service model. Service subscribers access queues and or topics to exchange data using point-to-point or publish and subscribe patterns. 1 interface. applications, Oracle Messaging Cloud Service provides a Java library that implements and extends the JMS 1 bae6478a18

Comparison of business integration software notable business integration and business process automation software. Scope of this comparison: Service-oriented architecture implementations; Message-oriented This article is a comparison of notable business integration and business process automation software bae6478a18

== References == bae6478a18 It's important to differentiate between event-driven and message-driven (aka queue driven) services: Event-driven services (e.g. AWS SNS) are decoupled from their consumers. Whereas queue / message driven services (e.g. AWS SQS) are coupled with their consumers. bae6478a18 In a web service, a web technology such as HTTP is used for transferring machine-readable file formats such as XML and JSON. bae6478a18
