Laptop letter-sized pad of paper. Notebooks and laptops continued A laptop computer or notebook computer, also known as a laptop or notebook, is a small, portable personal computer (PC). In most cases, unlike tablet computers which run on mobile operating systems, laptops tend to run on desktop operating systems, which were originally developed for desktop computers. Laptops typically have a clamshell form factor with a flat-panel screen on the inside of the upper lid and an alphanumeric keyboard and pointing device on the inside of the lower lid.

Notebooks emerged as their own separate market from laptops with the release of the NEC UltraLite in 1988. Most of the computer's internal hardware is in the lower part, under the keyboard, although many modern laptops have a built-in webcam at the top of the screen, and some even feature a touchscreen display
