

Maternity Nursing An Introductory Text

Development of the human body Jayne, Introductory Maternity Nursing (2005): "The fetal stage is from the beginning of the 9th week Development of the human body is the process of growth to maturity. The resulting zygote develops through cell proliferation and differentiation, and the resulting embryo then implants in the uterus, where the embryo continues development through a fetal stage until birth. This continues throughout life: through childhood and adolescence into adulthood. Further growth and development continues after birth, and includes both physical and psychological development that is influenced by genetic, hormonal, environmental and other factors. p. ISBN 978-0470-91777-0. 1183. Wiley. The process begins with fertilization, where an egg released from the ovary of a female is penetrated by a sperm cell from a male. Klossner, N 3f62d8749c
