Digital microfluidics March 2004. Droplets are dispensed, moved, stored, mixed, reacted, or analyzed on a platform with a set of insulated electrodes. 1039/c1lc20142e. doi:10 Digital microfluidics (DMF) is a platform for lab-on-a-chip systems that is based upon the manipulation of microdroplets. Digital microfluidics can be used together with analytical analysis procedures such as mass spectrometry, colorimetry, electrochemical, and electrochemiluminescence. doi:10. 2004 (3): 1. Membrane Technology. PMID 21666906. "Millipore and HyClone form bioprocessing alliance" 65bb884f21

Nuclear winter SunOpta BioProcess Inc. 2010. It is speculated that the resulting cooling, typically lasting a decade, would lead to widespread crop failure, a global nuclear famine, and an animal mass extinction event. Retrieved 2018-10-18 Nuclear winter is a severe and prolonged global climatic cooling effect that is hypothesized to occur after widespread urban firestorms following a large-scale nuclear war. Archived from the original on 2018-10-19. The hypothesis is based on the fact that such fires can inject soot into the stratosphere, where it can block some direct sunlight from reaching the surface of the Earth. Biofuel process to develop sugar substitute, cellulose ethanol
