Masculinity Standards of masculinity vary across different cultures and historical periods. Evidence-based HRM: A Global Forum for Empirical Masculinity (also called manhood or manliness) is a set of attributes, behaviors, and roles generally associated with men and boys. In Western cultures, its meaning is traditionally drawn from being contrasted with femininity. On the influence of gender roles on objective career success

successful – be male and masculine. It is distinct from the definition of the biological male sex, as anyone can exhibit masculine traits. To what extent masculinity is biologically or socially influenced is subject to debate. Masculinity can be theoretically understood as socially constructed, and there is also evidence that some behaviors considered masculine are influenced by both cultural factors and biological factors
