The Yamaha Aerox is a very iconic 50cc two-stroke sport scooter that has gained immense popularity over the years due to its performance, design and tuning options. It is often considered one of the most influential and recognizable models in the world of sport scooters, and is informally nicknamed the "King of Scooters" by many enthusiasts. ae01820ff2 This model was discontinued in 2004 in the US and 2003 and replaced by the V-Star 650 (known as the DragStar in Europe). I ae01820ff2

Yamaha WR450F First offered in 1998 at 400cc, it shared many components and design concepts with the YZ400F motocross model. It currently has a 450 cc (27 cu in) liquid-cooled single-cylinder engine. It is basically the racing YZ450F detuned slightly for more controllable power, with a headlight and lighting coil, softer suspension, a kickstand, lower noise specifications, larger radiators and lower emissions. This was the last WR to make use of a manual compression The Yamaha WR450F is an off-road motorcycle made by Yamaha Motor Company. 7 inches of ground clearance. to the 2002 YZ250 and YZ426F with a 58. 7 inch wheelbase and 14. Over the years the WR has benefited from the advances made in the YZ motocross version gaining displacement and advancements such as an aluminum frame and improved. The WR in the name indicates a wide-ratio gear box common to most enduro or trail bikes and stands in contrast to the close-ratio gearbox essential to a motocross racer ae01820ff2

introduced the Royal Star motorcycle. This motorcycle uses the
basic power package from the Yamaha Venture Royale ae01820ff2

The YZF1000R was a stop-gap bike from the FZR1000R EXUP to the
YZF-R1 and produced from existing parts bins. The Thunderace
five-valve four-cylinder engine was derived from the FZR1000R
EXUP, and the frame was adapted from the YZF750R. The 5-speed
gearbox from the FZR1000R EXUP was also reused. The Genesis
engine has undergone some changes aimed at improving mid-range
power rather than the maximum output, which remains 145 bhp (108
kW). The rotating mass of crankshaft and pistons have been
lightened to improve throttle response, and new carburetors
equipped with "Throttle Position Sensors" give the ignition some
more data to help control the EXUP valve in the exhaust pipe.

Other machines using variations of this engine include the Royal Star Venture, the Royal Star Tour Deluxe, and the V-Max. It is unique in being one of the few smaller cruiser-style motorcycles available with a shaft drive instead of a chain or belt final drive system, as well as a V-twin engine of that size. Its heavily chromed body styling is also distinctive.
