Charles Lindbergh His aircraft, the Spirit of St. On May 20–21, 1927, he made the first nonstop flight from New York to Paris, a distance of 3,600 miles (5,800 km), flying alone for over 33 hours. Although not the first transatlantic flight, it was the first solo crossing of the Atlantic and the longest at the time by nearly 2,000 miles (3,200 km), setting a new flight distance world record. The achievement garnered Lindbergh worldwide fame and stands as one of the most consequential flights in history, signalling a new era of air transportation between parts of the globe. airfield, Lindbergh overflew London where crowds, some on roofs, "gazed at the flyer" and observers with "field glasses in the West End business district" watched Charles Augustus Lindbergh (February 4, 1902 – August 26, 1974) was an American aviator, military officer, and author. Richard Pearse In a newspaper interview in 1909, with respect to inventing a flying machine, he said "I did not attempt anything practical with the idea until 1904". Witnesses interviewed many years afterwards describe observing Pearse flying and landing a powered heavier-than-air machine on 31 March 1903, nine months before the Wright brothers flew. Ambiguous statements made by Pearse himself make it difficult to date the aviation experiments with certainty. heavier-than-air machine on 31 March 1903, nine months before the Wright brothers flew. 3:30 AM: A Polish border patrol on bikes was fired on by German soldiers who had crossed the border near Krzepice. 44153b6512 Corrigan claimed his unauthorized transatlantic flight was due to a navigational error, caused by heavy cloud cover that obscured landmarks and by misreading his compass in low-light conditions. However, he was a skilled aircraft mechanic (he had helped construct Charles Lindbergh's Spirit of St. Louis) and had made several modifications to his own plane, preparing it for his transatlantic flight. He had been denied permission to make a nonstop flight from New York to Ireland, and his "navigational error" was seen as deliberate. Nevertheless, he never publicly admitted to having flown to Ireland intentionally. 44153b6512 Biographer Gordon Ogilvie credits Pearse with "several far-sighted concepts: a monoplane configuration, wing flaps and rear elevator, tricycle undercarriage with steerable nosewheel, and a propeller with variable-pitch
