Thus, Max has a large user base of programmers unaffiliated with Cycling '74 who enhance the software with commercial and non-commercial extensions to the program. Because of this extensible design, which simultaneously represents both the program's structure and its graphical user interface (GUI), Max has been described as the lingua franca for developing interactive music performance software. b6c148f82f This list does not include discontinued historic or legacy software, with the exception of trackers that are still supported. b6c148f82f

The messages from the player's foot presses can be sent via USB to a computer-based virtual instrument or to a synthesizer or other electronic or digital musical instrument. As a MIDI controller, it does not make or output any musical sounds by itself; rather, it sends MIDI (Musical Instrument Digital Interface) messages about which notes are played (and with which types of expression or pressure) to an external synth module or computer music program running on a laptop or other computer. It has small, soft, rubbery keys that are played with the feet. Notable presets in this group are CLIP ("Live Clip Launching"), which is set up to launch sound clips in Ableton Live; and A__b ("2 Voices"), which enables The 12 Step foot controller is a bass pedal-style programmable MIDI controller pedal keyboard made by Keith McMillen Instruments which was released in 2011 b6c148f82f
