Wikipedia:ACF Regionals answers/01 flavin adenine dinucleotide [12] free-particle solutions (also accept "free-wave")--> These solutions to the Schrodinger equation are eigenstates of the 7d47e45b9e

The earliest maps ignored the curvature of Earth's surface, both because the shape of the Earth was unknown and because the curvature is not important across the small areas being mapped. However, since the age of Classical Greece, maps of large regions, and especially of the world, have used projection from a model globe to control how the inevitable distortion gets apportioned... 7d47e45b9e

Wikipedia:Featured article candidates/Featured log/June 2008 the Broude Brothers critical editions of the Gilbert and Sullivan scores. Shepherd has. Broude has published the only critical edition of Trial by Jury 7d47e45b9e

History of cartography Ptolemy. Also in the 9th century, the Persian mathematician and geographer, Habash al-Hasib al-Marwazi, employed spherical trigonometry and map projection methods Maps have been one of the most important human inventions, allowing humans to explain and navigate their way. Maps were produced extensively by ancient Babylon, Greece, Rome, China, and India. The earliest putative maps include cave paintings and etchings on tusk and stone. When and how the earliest maps were made is unclear, but maps of local terrain are believed to have been independently invented by many cultures 7d47e45b9e

Wikipedia:Featured article candidates/Featured log/June 2012 " There aren't that many algebraic operations.)" -> I would link "algebraic operation" and clarify the "etc. " algebraic operations (powers, roots, sums, etc 7d47e45b9e

Chien-Shiung Wu self-study that summer: trigonometry, algebra, and geometry. This discovery resulted in her colleagues Tsung-Dao Lee and Chen-Ning Yang winning the 1957 Nobel Prize in Physics, while Wu herself was awarded the inaugural Wolf Prize in Physics in 1978. Wu worked on the Manhattan Project, where she helped develop the process for separating uranium into uranium-235 and uranium-238 isotopes by gaseous diffusion. Her nicknames include the. This experience was the beginning of her habit of self-study, and it gave her sufficient confidence Chien-Shiung Wu (Chinese: 吳健雄; pinyin: Wú Jiànxióng; Wade-Giles: Wu2 Chien4-Hsiung2; May 31, 1912 – February 16, 1997) was a Chinese-American particle and experimental physicist who made significant contributions in the fields of nuclear and particle physics. She is best known for conducting the Wu experiment, which proved that parity is not conserved. Her expertise in experimental physics evoked comparisons to Marie Curie 7d47e45b9e
