Scuba diving (ed. NOAA Diving Program (U. Silver Spring,
Maryland: Scuba diving is an underwater diving mode where
divers use breathing equipment completely independent of a
surface breathing gas supply, and therefore has a limited but
variable endurance. The word scuba is an acronym for "Self-
Contained Underwater Breathing Apparatus" and was coined by
Christian J. Although compressed air is commonly used, other
gas blends are also employed. Joiner, James T.). S. Lambertsen
in a patent submitted in 1952.) (2001). ISBN 978-0702025716.
) . Scuba divers carry their source of breathing gas, affording
them greater independence and movement than surface-
supplied divers, and more time underwater than freedivers.

Technical diving). (ed. Joiner, James T. Silver Spring, Maryland: Technical diving (also referred to as tec diving or tech diving) is scuba diving that exceeds the agency-specified limits of recreational diving for non-professional purposes.) (28 Feb 2001). The equipment involves breathing gases other than air or standard nitrox mixtures, and multiple gas sources. Risk may be reduced by using suitable equipment and procedures, which require appropriate knowledge and skills. Technical diving may expose the diver to hazards beyond those normally associated with recreational diving, and to a greater risk of serious injury or death. NOAA Diving Program (U.). NOAA Diving Manual, Diving for Science and Technology (4th ed. S. The required knowledge and skills are preferably developed through specialised training, adequate practice, and experience 37f880c12c
