Regional science more radical and post-modernist geographers. In the broadest sense, any social science analysis that has a spatial dimension is embraced by regional scientists. Topics in regional science include, but are not limited to location theory or spatial economics, location modeling, transportation, trade and migration flows, economic geography, land use and urban development, inter-industry analysis such as input-output analysis, environmental and ecological analysis, resource management, urban and regional policy analysis, and spatial data analysis. In an apparent effort to secure a larger share of research funds, geographers had the National Science Foundation's Regional science is a field of economics concerned with analytical approaches to problems that are related specifically to regional and international issues
