

Contrail Service Orchestration Juniper Networks

A key application of SD-WAN... 70355d75fe

SD-WAN the Tungsten Fabric (formerly Juniper Networks's OpenContrail). February 10, 2016. Network World. Retrieved A Software-Defined Wide Area Network (SD-WAN) is a wide area network that uses software-defined networking technology, such as communicating over the Internet using overlay tunnels which are encrypted when destined for internal organization locations. "SD-WAN: What it is and why you'll use it one day" 70355d75fe

Cloudwatt Retrieved 19 October 2020. deploys SDN to orchestrate public cloud service". The Paris-based business picked Juniper Networks's OpenContrail - an open source Cloudwatt was a core initiative of Project Andromède, one of France's periodic attempts at building a local computer industry. Project Andromède was announced in 2009 as a governmental desire for French-controlled cloud computing, with the goal of spending €285 million (US \$338 million) in "cloud souverain" ("sovereign cloud" in English) 70355d75fe

If standard tunnel setup and configuration messages are supported by all of the network hardware vendors, SD-WAN simplifies the management and operation of a WAN by decoupling the networking hardware from its control mechanism. This concept is similar to how software-defined networking implements virtualization technology to improve data center management and operation. In practice, proprietary protocols are used to set up and manage an SD-WAN, meaning there is no decoupling of the hardware and its control mechanism. 70355d75fe

Mirantis hardware and software from Dell, Juniper and Intel. Its primary container and cloud management products, part of the Mirantis Cloud Native Platform suite of products, are Mirantis Container Cloud and Mirantis Kubernetes Engine (formerly Docker Enterprise). The company focuses on the development and support of container and cloud infrastructure management platforms based on Kubernetes and OpenStack. is a Campbell, California, based B2B open source cloud computing software and services company. By early 2017, Mirantis changed its focus to offer managed services based on a number of open source Mirantis Inc. Mirantis has been an active member of the Cloud

Native Computing Foundation since 2016. It was one of the founding members of the OpenStack Foundation, a non-profit corporate entity established in September, 2012 to promote OpenStack software and its community. The company was founded in 1999 by Alex Freedland and Boris Renski 70355d75fe
