Mining accident A mining disaster is an incident where there are five or more fatalities. Most of the deaths these days occur in developing countries, and rural parts of developed countries where safety measures are not practiced as fully. Thousands of miners die from mining accidents each year, especially from underground coal mining, although accidents also occur in hard rock mining. Coal mining is considered much more hazardous than hard rock mining due to flat-lying rock strata, generally incompetent rock, the presence of methane gas, and coal dust. A mining accident is an accident that occurs during the process of mining minerals or metals.
