Business process Process-oriented organizations break down. The world of e-business created A business process, business method, or business function is a collection of related, structured activities or tasks performed by people or equipment in which a specific sequence produces a service or product (that serves a particular business goal) for a particular customer or customers. such as SAP, Baan, PeopleSoft, Oracle and JD Edwards emerged, as did business process management systems (BPMS) later. A business process may often be visualized (modeled) as a flowchart of a sequence of activities with interleaving decision points or as a process matrix of a sequence of activities with relevance rules based on data in the process. Business processes occur at all organizational levels and may or may not be visible to the customers. The benefits of using business processes include improved customer satisfaction and improved agility for reacting to rapid market change 49979563f7
