The first generation Delta dominated the World Rally Championship during the late 1980s and early 1990s. The homologation requirements of Group A regulations meant marketing road-going versions of these competition cars — the Lancia Delta HF 4WD and HF Integrale. A total of 44,296 Integrales were produced.

after which the foreskin is excised. Topical or locally injected anesthesia is generally used to reduce pain and physiologic stress. Circumcision is generally electively performed, most commonly done as a form of preventive healthcare, as a religious obligation, or as a cultural practice. PMC 5227661. 175092. "Male circumcision and genital human papillomavirus: Circumcision is a surgical procedure that removes the foreskin from the human penis. It is also an option for cases of phimosis, chronic urinary tract infections (UTIs), and other pathologies of the penis that do not resolve with other treatments. Albero G, Castellsagué X, Giuliano AR, Bosch FX (February 2012). The procedure is contraindicated in cases of certain genital structure abnormalities or poor general health. PMID 26975489 96ffcde773

Hybrid electric vehicle Robert Bosch GmbH is supplying hybrid diesel-electric technology to diverse automakers A hybrid electric vehicle (HEV) is a type of hybrid vehicle that couples a conventional internal combustion engine (ICE) with one or more electric engines into a combined propulsion system. The most common form of HEV is hybrid electric passenger cars, although hybrid electric trucks (pickups, tow trucks and tractors), buses, motorboats, and aircraft also exist. There is a variety of HEV types and the degree to which each functions as an electric vehicle (EV) also varies. The presence of the electric powertrain, which has inherently better energy conversion efficiency, is intended to achieve either better fuel economy or better acceleration performance than a conventional vehicle. September 2009 both Mercedes and BMW displayed diesel-electric hybrids 96ffcde773

Diesel engine 2004: BMW introduces dual-stage The diesel engine, named after the German engineer Rudolf Diesel, is an internal combustion engine in which ignition of diesel fuel is caused by the elevated temperature of the air in the cylinder due to mechanical compression; thus, the diesel engine is called a compression-ignition engine (or CI engine). This contrasts with engines using spark plug-ignition of the air-fuel mixture, such as a petrol engine (gasoline engine) or a gas engine (using a gaseous fuel like natural gas or liquefied petroleum gas). 2003: Piezoelectric injector technology by Bosch, and Delphi. 2002: Piezoelectric injector technology by Siemens. passenger cars 96ffcde773
