Combine harvester Among the crops harvested with a combine are wheat, rice, oats, rye, barley, corn (maize), sorghum, millet, soybeans, flax (linseed), sunflowers and rapeseed (canola). In the 1920s, Case Corporation and John Deere made combines, introducing tractor-pulled harvesters with a second engine The modern combine harvester, also called a combine, is a machine designed to harvest a variety of cultivated seeds. threshing machines were more common. The separated straw (consisting of stems and any remaining leaves with limited nutrients left in it) is then either chopped onto the field and ploughed back in, or laid out in rows, ready to be baled and used for bedding and cattle feed. Combine harvesters are one of the most economically important labour-saving inventions, significantly reducing the fraction of the population engaged in agriculture 310b1090fd

Industrial balers are also used in material recycling facilities, primarily for baling metal, plastic, or paper for transport. 310b1090fd

Crosley At first called the Crosley Corporation and later Crosley Motors Incorporated, the Cincinnati, Ohio, firm was active from 1939 to 1952, interrupted by World War II production. plow, a moldboard plow, snow plow, a cutter-bar mower, sickle-bar mower, three-gang reel-type mower, a rolling coulter, disc harrow, cultivator, hay Crosley Motors Incorporated was a small, independent American manufacturer of economy cars or subcompact cars, bordering on microcars. For export, the cars were badged Crosmobile. Their station wagons were the most popular model, but also offered were sedans, pickups, convertibles, a sports car, and even a tiny jeep-like vehicle 310b1090fd
