

Analisi Matematica 1

Marcellini Sbordone

Jensen's inequality generalizes the statement that the secant line of a convex function lies above the graph of the function, which... 31e578c932 These theories are usually studied in the context of real and complex numbers and functions. Analysis evolved from calculus, which involves the elementary concepts and techniques of analysis. 31e578c932

Jensen's inequality Nicola Fusco; Paolo Marcellini; Carlo Sbordone (1996). *Analisi Matematica Due*. Walter Rudin (1987). ISBN 978-88-207-2675-1. Given its generality, the inequality appears in many forms depending on the context, some of which are presented below. 100(8):768–71. It was proved by Jensen in 1906, building on an earlier proof of the same inequality for doubly-differentiable functions by Otto Hölder in 1889. Real and In mathematics, Jensen's inequality, named after the Danish mathematician Johan Jensen, relates the value of a convex function of an integral to the integral of the convex function. Liguori. In its simplest form the inequality states that the convex transformation of a mean is less than or equal to the mean applied after convex transformation (or equivalently, the opposite inequality for concave transformations) 31e578c932

Mathematical analysis Fusco, Nicola; Marcellini, Paolo; Sbordone, Carlo (1996). ISBN 978-1402006098. Springer-Verlag. *Analisi Matematica Due* (in Italian). ISBN 978-8820726751 Analysis is the branch of mathematics dealing with continuous functions, limits, and related theories, such as differentiation, integration, measure, infinite sequences, series, and analytic functions. Liguori Editore [it] 31e578c932

Analysis may be distinguished from geometry; however, it can be applied to any space of mathematical objects that has a definition of nearness (a topological space) or specific distances between objects (a metric space). 31e578c932

Paolo Marcellini He was a full professor at the University of Florence, actually Professor Emeritus, who works on partial differential equations, calculus of variations and related mathematics. He was the Director of the Italian National Group GNAMPA of the Istituto Nazionale di Alta Matematica (INdAM) and Dean of the Faculty of Mathematical, Physical and Natural Sciences of the University of Florence. with Carlo Sbordone, Nicola Fusco: Analisi Matematica Due, Napoli: Liguori Paolo Marcellini (born 25 June 1947 in Fabriano) is an Italian mathematician who deals with mathematical analysis. Online with Carlo Sbordone: Analisi Matematica Uno, Napoli: Liguori 1996 31e578c932
