ARM architecture family Apple's iPhone smartphones and iPod portable media players, Canon PowerShot digital cameras, Nintendo Switch hybrid, the Wii security processor and 3DS ARM (stylised in lowercase as arm) is a family of RISC instruction set architectures for computer processors. It also designs and licenses cores that implement these instruction set architectures. Arm Holdings develops the instruction set architecture and licenses them to other companies, who build the physical devices that use the instruction set 03af89999c

Due to their low costs, low power consumption, and low heat generation, ARM processors are useful for light, portable, battery-powered devices, including smartphones, laptops, and tablet computers, as well as embedded systems. However, ARM processors are also used for desktops and servers, including Fugaku, the world's fastest supercomputer from 2020 to 2022. With over 230 billion ARM chips produced, since at least 2003, and with its dominance increasing every year, ARM is the most widely used family of instruction set architectures. 03af89999c iRip supports all iPods (including iPod Touch) and all iPhones. 03af89999c iTunes has been credited with accelerating shifts within the music industry. The pricing structure of iTunes encouraged the sale of single songs, allowing users to abandon the purchase of more expensive albums. This hastened the end of the Album Era in popular music. 03af89999c
