Wikipedia:Reference desk/Archives/Miscellaneous/2009 July 30 contract to the position set manually or by an exposure-priority semi-auto function. These were bottom of the range Zenit-E or Minolta bodies with corresponding Miscellaneous desk 2ce94df8fb

The primary difference between the top-of-the-line X-700 and the X-570 is that the latter lacked the fully automatic Program exposure mode. However, the X-570 added an important feature that would be part of all subsequent X series

cameras (but never added to the X-700), a match LED exposure meter. This system indicated the selected shutter speed with a blinking LED and the suggested shutter speed, based on the exposure value and the selected lens aperture, with a solid LED. Some consider the X-500 more... 2ce94df8fb The body style became Minolta's standard manual-focus SLR body, so the XG-M strongly resembles subsequent Minolta cameras. 2ce94df8fb July 31 > 2ce94df8fb Welcome to the Wikipedia Miscellaneous Reference Desk Archives 2ce94df8fb Leica and Minolta signed a technical cooperation agreement in June 1972. One of its results was the joint development of the Leica CL, a compact rangefinder camera introduced in 1973 and discontinued a few years later. The CLE was a new rangefinder body resembling the Leica CL. 2ce94df8fb The last version of the XG-1 is marketed as Minolta XG-1(n), featuring a new design closely similar to the top of the line, Minolta XG-M. 2ce94df8fb In 2003, Minolta merged with Konica to form Konica Minolta. On 19 January 2006, Konica Minolta announced that it was leaving the camera and photo business, and that it would sell a portion of its SLR camera business to Sony as part of its move to pull completely out of the business of selling cameras... 2ce94df8fb

Minolta XG-M The Minolta XG-M was a 35mm single-lens reflex camera introduced in 1981 by Minolta of Japan. When released, it was the top model in Minolta's XG series of consumer-grade manual focus SLRs, replacing the XG-9. This was also the first camera to use Minolta's new logo, which was used until the 2003 merger into Konica Minolta. It was also known as the X-70 on the Japanese market, in The Minolta XG-M was a 35mm single-lens reflex camera introduced in 1981 by Minolta of Japan. Changes from that model included a metered manual mode (the XG-9's meter was switched off in manual), and a revised body style with rearranged controls. It was also known as the X-70 on the Japanese market, in which it was not available until 1982 2ce94df8fb

Minolta X-700 It was the top model of their final manual-focus SLR series before the introduction of the auto-focus Minolta Maxxum 7000. It also The Minolta X-700 is a 35 mm single-lens reflex film camera introduced by Minolta in 1981. autoexposure in addition to the XG-M's aperture priority and metered manual modes. This program mode was referred to as "MPS" or Minolta Program System 2ce94df8fb
