Freediving blackout Blackout may also be referred to as a syncope or fainting. Victims are often established practitioners of breath-hold diving, are fit, strong swimmers and have not experienced problems before. ; Pollock Freediving blackout, breath-hold blackout, or apnea blackout is a class of hypoxic blackout, a loss of consciousness caused by cerebral hypoxia towards the end of a breath-hold (freedive or dynamic apnea) dive, when the swimmer does not necessarily experience an urgent need to breathe and has no other obvious medical condition that might have caused it. It can be provoked by hyperventilating just before a dive, or as a consequence of the pressure reduction on ascent, or a combination of these. Lindholm, P. Retrieved 25 January 2017. Durham, North Carolina: Divers Alert Network. Krack, Kirk; Stepanek, Martin; Cruickshank, Mandy-Rae

fb2f37a511 113 fb2f37a511 Underwater diving can be described as a human activity – intentional, purposive,
conscious and subjectively meaningful sequence of actions. Underwater diving is practiced as part of an
occupation, or for recreation, where the practitioner submerges below the surface of the water or other liquid for
a period which may range between seconds to the order of a day at a time, either exposed to the ambient
pressure or isolated by a pressure resistant suit, to interact with the underwater environment for pleasure,
competitive sport, or as a means to reach a work site for profit, as a public... fb2f37a511 127 fb2f37a511 30

Cruickshank holds several Canadian and world records. She set the women's world record for constant ballast by
diving to a depth of 88 metres (289 ft) on one breath, in April 2007 in the Cayman Islands. On April 8, 2005,
Cruickshank set the new world record in the Constant Weight without fins discipline, free-diving to 50m. On April
11, 2005, she set the new world record in the Free Immersion discipline, diving to 74m by pulling herself down
and up a line. fb2f37a511 London WC2 (edit | talk | histo... fb2f37a511 11 fb2f37a511 79
