

Sharp Aquos 60 Quattron Manual

List of Japanese inventions and discoveries Multi-primary color display (MPC) — The Sharp Aquos Quattron (2010) 3D LCD TV introduced four primary color sub-pixels, including This is a list of Japanese inventions and discoveries. Japanese pioneers have made contributions across a number of scientific, technological and art domains. filmed in 3D high definition. In particular, Japan has played a crucial role in the digital revolution since the 20th century, with many modern revolutionary and widespread technologies in fields such as electronics and robotics introduced by Japanese inventors and entrepreneurs

Sharp PC-1500 - European, Australasian and...
Sharp PC-1500 - Japanese version with blue paint around LCD. CE-157 Kana module bundle model. Known as PC-1500D (1984) Eight versions of this pocket computer with 2 KB memory:
An external slot is available and accepts memory (from 4 KB to 32 KB) and ROM modules.
Sharp PC-1500 - Japanese version (1981)

MZ-2500 It is a successor to the MZ-2000/2200 and a direct successor to the MZ-80B from the previous generation. It is also the final model of the entire 8-bit MZ series with architecture of its kind. is an 8-bit personal computer released on 1 October 1985 as part of the Sharp MZ series. It is a successor to the MZ-2000/2200 and a direct successor The MZ-2500, also known as the Super MZ, is an 8-bit personal computer released on 1 October 1985 as part of the Sharp MZ series. Its successor was the Sharp MZ-2861 which has a compatible mode and a newly developed

16-bit mode. The development code is LEY and can be found in the circuit diagram. It is sometimes referred to as the best 8-bit machine along with the 6809 FM77AV and the MB-S1. In Japanese computer magazines, the MZ-2500 was also called 'The Phoenix'. The MZ-2000 was a model that was given significant functions, along with a faster processing speed 3aa6ce691d

Sharp PC-1500 "CE-152 : The clone by GENERAL ELECTRIC PC-1500. 355. Sharp PC-1600 Operation Manual, 1986, p. and more about Sharp PC-1500 and Tandy PC-2". info". "Emke - The Sharp PC-1500 was a pocket computer produced by Sharp between 1981 and 1985. A rebadged version was also sold as the TRS-80 Pocket Computer PC-2 3aa6ce691d

The whole computer was designed around the LH5801, an 8-bit CPU similar to the Zilog Z80, but all laid-out in power-saving CMOS circuits. Equipped with 2 KB of on-board RAM, the programming language is BASIC. Later, German engineers provided an assembler for the machine. Later even a C compiler followed. 3aa6ce691d
