Nokia had plans for an Internet tablet since before 2000. Modern tablets are based on smartphones, the only differences being that tablets are relatively larger than smartphones, with screens 7 inches (18 cm) or larger, measured diagonally, and may not support access to a cellular network. Unlike laptops (which have traditionally run off operating systems usually designed for desktops), tablets usually run mobile operating systems, alongside smartphones. Tablets, being computers, have similar capabilities, but lack some input/output (I/O) abilities that others have b1f901ca7e
