Law Authority of Law, Essays on Law and Morality. ISBN 978-0-19-825493-5. The creation of laws themselves may be influenced by a constitution, written or tacit, and the rights encoded therein. Redfem, Alan (2004). Oxford University Press. Law is a set of rules that are created and are enforceable by social or governmental institutions to regulate behavior, with its precise definition a matter of longstanding debate. &quot;Regulation of International Arbitration&quot;. State-enforced laws can be made by a legislature, resulting in statutes; by the executive through decrees and regulations; or by judges' decisions, which form precedent in common law jurisdictions. It has been variously described as a science and as the art of justice. An autocrat may exercise those functions within their realm. The law shapes politics, economics, history and society in various ways and also serves as a mediator of relations between people f5c8d587c7
