Lung cancer Lung cancer is caused by genetic damage to the DNA of cells in the airways, often caused by cigarette smoking or inhaling damaging chemicals. extending the average person's lifespan by around 2 months. Eventually lung tumors metastasize, spreading to other parts of the body. Damaged airway cells gain the ability to multiply unchecked, causing the growth of a tumor. Without treatment, tumors spread throughout the lung, damaging lung function. For stage I and stage II NSCLC the first line of treatment is often surgical removal of the affected Lung cancer, also called lung carcinoma, is a malignant tumor that originates in the tissues of the lungs

Longevity claims Those asserting lifespans of 110 years or more are referred to as supercentenarians. Many have either no official verification or are backed only by partial evidence. Researchers in Denmark have found a way to determine when a deceased person was born using radiocarbon dating done on the lens of the eye Longevity claims are unsubstantiated cases of asserted human longevity. This article lists living claims greater than that of the oldest living person whose age has been independently verified, British woman Ethel Caterham, aged 115 years, 358 days, and deceased claims greater than that of the oldest person ever whose age has been verified, French woman Jeanne Calment. human lifespan. Cases where longevity has been fully verified, according to modern standards of longevity research, are reflected in an established list of supercentenarians based on the work of organizations such as the Gerontology Research Group (GRG) or

Loevinger's theory contributes to the delineation of ego development, which goes beyond the fragmentation of trait psychology and looks at personality as a meaningful whole. 601a581c8e Amitābha is the main figure in two influential Indian Buddhist Mahayana Scriptures: the Sutra of Measureless Life and the Amitābha Sūtra. According to the Sutra of Measureless Life, Amitābha established a pure land of perfect peace and happiness, called Sukhāvātī ("Blissful"), where beings who mindfully remember him with faith may be reborn and then quickly attain enlightenment. The pure land is the result of a set of vows Amitābha made long ago. As his... 601a581c8e

Hymenolepis nana The short lifespan and rapid course of development also facilitate the spread and ready availability Dwarf tapeworm (Hymenolepis nana, also known as Rodentolepis nana, Vampirolepis nana, Hymenolepis fraterna, and Taenia nana) is a cosmopolitan species though most common in temperate zones, and is one of the most common cestodes (a type of intestinal worm or helminth) infecting humans, especially children. making rapid infection and

Loevinger's stages of ego development model and the works of Harry Stack Sullivan (1892–1949) in which "the ego was theorized to mature and evolve through stages across the lifespan as a result of a dynamic interaction between the inner self and the outer environment" are proposed by developmental psychologist Jane Loevinger (1918–2008) and conceptualize a theory based on Erik Erikson's psychosocial model and the works of Harry Stack Sullivan (1892–1949) in which "the ego was theorized to mature and evolve through stages across the lifespan as a result of a dynamic interaction between the inner self and the outer environment"

Amitābha is also known by the name Amitāyus ("Measureless Life"). Amitābha's measureless life is seen as being Amitābha (Sanskrit pronunciation: [emɪ'ta:bʱe], "Measureless" or "Limitless" Light), also known as Amituofo in Chinese, Amida in Japanese and Öpakmé in Tibetan, is one of the main Buddhas of Mahayana Buddhism and the most widely venerated Buddhist figure in East Asian Buddhism. Amitāyus, this Buddha is also associated with

As in other miniature wargames, players enact battles using miniature models of warriors and fighting vehicles. The playing area is a tabletop model of a battlefield, comprising models of buildings, hills, trees, and other terrain features. Each player takes turns moving their model warriors around the battlefield and fighting their opponent's warriors. These fights are resolved using dice and simple arithmetic.

Development of the human body male. Further growth and development continues after birth, and includes both physical and psychological development that is influenced by genetic, hormonal, environmental and other factors. Ecological systems theory variability in development processes. Bronfenbrenner developed the foundations of the theory throughout his career, published a major statement of the theory in *American Psychologist*, articulated it in a series of propositions and hypotheses in his most cited book, *The Ecology of Human Development* and further developing it in *The Bioecological Model of Human Development* and later writings. As the theory evolved, it placed increasing emphasis on the role of the developing person as an active agent in development and on understanding developmental process rather than. A primary contribution of ecological systems theory was to systemically examine contextual variability in development processes. As the theory evolved, it placed increasing emphasis on the role of the developing person as an active agent in development Ecological systems theory is a broad term used to capture the theoretical contributions of developmental psychologist Urie Bronfenbrenner
