Electrotherapy (cosmetic) "Facial and Body Electrotherapy Treatments" John Low, Ann Reed, Ann Reed (SRP.), Electrotherapy explained: principles and practice, 4th Edition, Publisher Cosmetic electrotherapy is a range of beauty treatments that uses low electric currents passed through the skin to produce several therapeutic effects such as muscle toning in the body and micro-lifting of the face. Some studies have questioned its effectiveness in these contexts, citing a lack of sufficient scientific evidence to support its claimed benefits. In rehabilitation medicine, electrotherapy has been widely utilized and studied; however, its use on healthy muscles, particularly in cosmetic and non-clinical settings, remains controversial.
