Agriculture Archived from the original on 5 September 2016. Southern Appalachian Biological Control Initiative Workshop. In the 20th century, industrial agriculture based on large-scale monocultures came to dominate agricultural output. Retrieved 10 April 2017 Agriculture is the practice of cultivating the soil, planting, raising, and harvesting both food and non-food crops, as well as livestock production. Agriculture was a key factor in the rise of sedentary human civilization, whereby farming of domesticated plants and animals created food surpluses that enabled people to live in the cities. While humans started gathering grains at least 105,000 years ago, nascent farmers only began planting them around 11,500 years ago. Sheep, goats, pigs, and cattle were domesticated around 10,000 years ago. Broader definitions also include forestry and aquaculture. Plants were independently cultivated in at least 11 regions of the world. Moth: An Overview" 5b7e68a529

Productivity is often measured as the ratio of (aggregate) output to (aggregate) input in the production of goods and services. Productivity is increased by lowering the amount of labor, capital, energy or materials that go into producing any given amount of economic goods and services. Increases in productivity are largely responsible for the increase in per capita living standards. 5b7e68a529 Miscellaneous 5b7e68a529

Two-wheel tractor A two-wheeled tractor specializes in pulling any of numerous types of implements, whereas rotary tillers specialize in soil tillage. The operator usually walks behind it or rides the implement being towed. 10 years later, the wheels were called "Hamilton wheels" when used on a Fordson tractor. Similar terms are mistakenly applied to the household rotary tiller or power tiller; although these may be wheeled and/or self-propelled, they are not tailored for towing implements. In 1916 he helped form the Fageol Motors Company, where he assisted Two-wheel tractor or walking tractor (French: motoculteur, Russian: мотоблок (motoblok), German: Einachsschlepper) are generic terms understood in the US and in parts of Europe to represent a single-axle tractor, which is a tractor with one axle, self-powered and self-propelled, which can pull and power various farm implements such as a trailer, cultivator or harrow, a plough, or various seeders and harvesters 5b7e68a529
