From the beginning of the 20th century, the assessment of the grade level of texts for different grades of readers was a central concern of reading research. Klare's contribution to that effort came both in his critical reviews of the studies and his participation in original research. There were over 1,000 published studies on this topic. In ERIC Clearinghouse in Reading and Communication Skills, with abstract in Research in Education George Roger Klare (April 17, 1922 – March 3, 2006) was a World War II veteran and a distinguished professor of psychology and dean at Ohio University. non-traditional instruction: The role of readability 5108a4251e
