Albert Einstein Einstein also made important contributions to quantum theory. His mass-energy equivalence formula $E = mc^2$, which arises from special relativity, has been called "the world's most famous equation". wished to derive it from the field equations themselves. Since the equations of general relativity are non-linear, a lump of energy made out of pure gravitational Albert Einstein (14 March 1879 – 18 April 1955) was a German-born theoretical physicist who is best known for developing the theory of relativity. He received the 1921 Nobel Prize in Physics for his services to theoretical physics, and especially for his discovery of the law of the photoelectric effect a3b08be0fc
