The list contains 50,052 articles. --Cewbot (talk) 14:18, 26 August 2025 (UTC) Transformers are used to change AC voltage levels, such transformers being termed step-up or step-down type to increase or decrease voltage level... "Lithium (medication)",,

Transformer A varying current in any coil of the transformer produces a varying magnetic flux in the transformer's core, which induces a varying electromotive force (EMF) across any other coils wound around the same core. Electrical energy can be transferred between separate coils without a metallic (conductive) connection between the two circuits. Faraday's law of induction, discovered in 1831, describes the induced voltage effect in any coil due to a changing magnetic flux encircled by the coil. The transformer winding voltage ratio In electrical engineering, a transformer is a passive component that transfers electrical energy from one electrical circuit to another circuit, or multiple circuits. secondary windings in an ideal transformer, a voltage is induced in each winding proportional to its number of turns

Reaction of polyepoxides with themselves or with polyfunctional hardeners forms a thermosetting... "Chlorpromazine",,

may be reacted (cross-linked) either with themselves through catalytic homopolymerisation, or with a wide range of co-reactants including polyfunctional amines, acids (and acid anhydrides), phenols, alcohols and thiols (sometimes called mercaptans). These co-reactants are often referred to as hardeners or curatives, and the cross-linking reaction is commonly referred to as curing.

Epoxy By using vacuum impregnation on uncured epoxy, winding-to-winding, winding-to-core, and winding-to-insulator Epoxy is the family of basic components or cured end products of epoxy resins. Epoxy resins, also known as polyepoxides, are a class of reactive prepolymers and polymers which contain epoxide groups. for potting transformers and inductors. The IUPAC name for an epoxide group is an oxirane. The epoxide functional group is also collectively called epoxy
