Data mining Aside from the raw analysis step, it also involves database and data management aspects, data pre-processing, model and inference considerations, interestingness metrics, complexity considerations, post-processing of discovered structures, visualization, and online updating. Data mining is the analysis step of the "knowledge discovery in databases" process, or KDD. Data mining is an interdisciplinary subfield of computer science and statistics with an overall goal of extracting information (with intelligent methods) from a data set and transforming the information into a comprehensible structure for further use. Information Science Reference, ISBN 978-1-59904-162-9 Tan, Pang-Ning; Steinbach, Michael; and Kumar, Vipin (2005); Introduction to Data Mining, ISBN 0-321-32136-7 Data mining is the process of extracting and finding patterns in massive data sets involving methods at the intersection of machine learning, statistics, and database systems c03662f800

Association rule learning Association Analysis: Basic Association rule learning is a rule-based machine learning method for discovering interesting relations between variables in large

databases. Tan, Pang-Ning; Michael, Steinbach; Kumar, Vipin (2005). In any given transaction with a variety of items, association rules are meant to discover the rules that determine how or why certain items are connected. ResearchGate. "Chapter 6. management systems";. Retrieved 2021-12-10. It is intended to identify strong rules discovered in databases using some measures of interestingness c03662f800

Afghanistan Occupying 652,864 square kilometers (252,072 sq mi) of land, the country is predominantly mountainous with plains in the north and the southwest, which are separated by the Hindu Kush mountain range. Islam in the World Today: A Handbook of Politics - Afghanistan, officially the Islamic Emirate of Afghanistan, is a landlocked country located at the crossroads of Central and South Asia. Kabul is the country's capital and largest city. It is bordered by Pakistan to the east and south, Iran to the west, Turkmenistan to the northwest, Uzbekistan to the north, Tajikistan to the northeast, and China to the northeast and east. found in the Tang e Azao Valley in the Ghor region. Afghanistan's population is estimated to be between 36 and 50 million. Ende, Werner; Steinbach, Udo (15 April 2010) c03662f800

Reaching the qualification standard set by the relevant sport's international governing body did not automatically mean that the athlete was nominated for Beijing, as the DOSB had stricter qualification standards. An athlete needed to have a somewhat realistic chance for a top 12

position. An exception to this are the team events, as the number of competing teams is already very limited through the IOC standards, and a chance for a respective place is already given by the qualification. c03662f800 1 c03662f800 Centralized discussion c03662f800 Future of Wikinews (potential merger with Wikipedia) c03662f800

Cosine similarity P. Technical Committee on Data Engineering 24 (4): 35–43. -N. Tan, M. Kumar, Introduction to Data Mining, Addison-Wesley (2005), ISBN 0-321-32136-7 In data analysis, cosine similarity is a measure of similarity between two non-zero vectors defined in an inner product space. Steinbach & V. The cosine similarity always belongs to the interval. Cosine similarity is the cosine of the angle between the vectors; that is, it is the dot product of the vectors divided by the product of their lengths. It follows that the cosine similarity does not depend on the magnitudes of the vectors, but only on their angle c03662f800

proposals c03662f800 It was developed by Grove Karl Gilbert in 1884 as his ratio of verification (v) and now is often called the critical success index in meteorology. It was later developed independently by Paul Jaccard, originally giving the French name coefficient de communauté (coefficient of community), and independently formulated again by Taffee Tadashi Tanimoto. Thus,

it is also called Tanimoto index or Tanimoto coefficient in some fields. c03662f800 , c03662f800

Virtual team Powell, Piccoli and Ives (2004) define virtual teams as "groups of geographically, organizationally and/or time dispersed workers brought together by information and telecommunication technologies to accomplish one or more organizational tasks. The term can also refer to groups or teams that work together asynchronously or across organizational levels. significantly in the degree to which they took action to protect their employees. Steinbach, Kautz and Korsgaard (2021) found that these firm compensation actions A virtual team (also known as a geographically dispersed team, distributed team, or remote team) usually refers to a group of individuals who work together from different geographic locations and rely on communication technology such as email, instant messaging, and video or voice conferencing services in order to collaborate. " As documented by Gibson (2020), virtual teams grew in importance and number during 2000-2020, particularly in light c03662f800

Non-denominational Muslim Ende, Werner; Steinbach, Udo (15 December 2011). "American Journal of Islamic Social Sciences 21:2". Such Muslims do not think of themselves as belonging to a denomination but rather as "just Muslims" or "non-denominational Muslims. Islam in the World Today: A Handbook of Politics Non-denominational Muslims (Arabic: مسلمون بلا طائفة) are Muslims who do not belong to, do not self-identify with, or cannot be readily classified under one of the identifiable Islamic schools and branches. " Muslims who do not adhere to a sect are also known as non-sectarian Muslims. Nevin c03662f800

n c03662f800 It is defined in general taking the ratio of two sizes (areas or volumes), the intersection size divided by the union size, also called intersection over union (IoU). c03662f800 + c03662f800 The result was no consensus. After extended time for discussion, there

is a clear absence of consensus and a well-supported argument that the subject was already notable in terms of coverage prior to the arrest that serves as the basis of the WP:BLP1E assertion. Given the volume and divided nature of participation, it does not appear that further relisting will yield a clearer resolution. BD2412 T 19:48, 22 February 2021 (UTC)[reply] c03662f800

Germany at the 2008 Summer Olympics A total of 439 athletes were nominated to participate in the Games. Reaching the qualification standard set by the relevant sport's international governing body did not automatically mean Germany competed at the 2008 Summer Olympics in Beijing, People's Republic of China. The German Olympic Sports Confederation (German: Deutscher Olympischer Sportbund, DOSB) nominated athletes on 29 May, 23 June and 15 July 2008. 29 May, 23 June and 15 July 2008 c03662f800
