Cardiac Muscle 1204e97028 Major Functions 1204e97028 Hierarchy of Organization 1204e97028 Clinical
Application 6.2 Hair Loss Most common type of baldness is pattern baldness; top of head loses hair (called
androgenic alopecia) Associated with lowered level of testosterone (men) or estrogen (women) Progenitor
cells are lacking in bald spots, but stem cells are present Alopecia areata: body produces antibodies that
attack hair follicles; autoimmune hair loss. 1204e97028 Control of Hormonal Secretions 1204e97028
Clinical Application 13.2 1204e97028 Figure 5.27 Connective Tissue Types 1204e97028 Osmosis

system video 1 hour, 15 minutes 1204e97028 To Help You Remember! 1204e97028 Skin and Its Tissues •
Two or more types of tissues grouped together and performing specialized functions constitute an arran. •
Skin is the largest organ in body by weight. • Skin is also called the cutaneous membrane. • The skin and its
accessory structures hair, nails, glands, sensory receptors make up the integumentary system. • Composed
of several tissue types. • Contains 2 layers: epithelial tissue overlying connective tissue. • Outer layer is the
epidermis • Deeper layer is the dermis 1204e97028 Figure 13.8 Control Sources 1204e97028 General

Tanning bed uses doses of UV radiation that can overwhelm body's natural protective responses against skin cancer. Basal cell carcinoma and squamous cell carcinoma arise from epithelial cells in skin Melanomas arise from melanocytes. Melanomas are least common (4%) skin cancers, but cause 80% of skin cancer deaths. 1204e97028 Introduction 1204e97028 How to study and pass Anatomy \u0026amp; Physiology! - How to study and pass Anatomy \u0026amp; Physiology! 5 minutes, 35 seconds - Here are our Top 5 tips for studying and passing **Anatomy**, \u0026amp; **Physiology**,!! -- LINKS - (When available, we use affiliate links and ... 1204e97028 Valuable study guides to accompany Hole's Human Anatomy and Physiology, 13th edition by Shier - Valuable

1204e97028 Figures 5.10 and 5.11 Epithelial Tissue Types 1204e97028 Regulation of Body Temperature
Important to regulate body temperature; slight shift can disrupt rates of metabolic reactions Set point is
monitored by Hypothalamus Deep body temperature stays close to set point of 37 degrees Celsius or 98.6
degrees Fahrenheit Skin plays key role in homeostatic mechanisms that regulate body temperature.
