In his book Dobzhansky applied the theoretical work of Sewall Wright (1889–1988) to the study of natural populations. Dobzhansky uses theories of mutation, natural selection, and speciation to explain the habits of populations and the resulting effects on their genetic behavior. The book said evolution was a process that accounts for the diversity of all life on Earth. Dobzhansky said that evolution regarding the origin and nature of...

Finns In the 19th century Finns or Finnish people (Finnish: suomalaiset, IPA: ['suɔ̌mlɑiʃet]) are a Baltic Finnic ethnic group native to Finland. Finns are traditionally divided into smaller regional groups that span several countries adjacent to Finland, both those who are native to these countries as well as those who have resettled. These include the Kvens and Forest Finns in Norway, the Tornedalians in Sweden, and the Ingrian Finns in Russia. Despite the differences, the IBS analysis points out that Western and Eastern Finns share overall a largely similar genetic foundation. Some of these may be classified as separate ethnic groups, rather than subgroups of Finns

Music Encoding Initiative Laurent; Fujinaga, Ichiro (2014). The MEI community solicits input and development directions from specialists in various music research communities, including technologists, librarians, historians, and theorists in a common effort to discuss and define best practices for representing a broad range of musical documents and structures. The term "MEI", like "TEI", describes the governing organization and the markup language. The results of these discussions are then. "Introduction to SIMSSA (Single Interface for Music Score Searching and Analysis)" MEI closely mirrors work done by text scholars in the Text Encoding Initiative (TEI) and while the two encoding initiatives are not formally related, they share many common characteristics and development practices. Proceedings of the 1st International The Music Encoding Initiative (MEI) is an open-source effort to create a system for representation of musical documents in a machine-readable structure

→ d0d9adc2b9 Crossbills are specialist feeders on conifer cones, and the unusual bill shape is an adaptation which enables them to extract seeds from cones. These birds are typically found in higher northern hemisphere latitudes, where their food sources grow. They irrupt out of the breeding range when the cone crop fails. Crossbills breed very early in the year, often in winter months, to take advantage of maximum cone supplies. d0d9adc2b9

Affirming the consequent Introduction to Analysis with Proof, 5th edition. Hurley, Patrick J. A Concise Introduction to Logic (11th ed In propositional logic, affirming the consequent (also known as converse error, fallacy of the converse, or confusion of necessity and sufficiency) is a formal fallacy (or an invalid form of argument) that is committed when, in the context of an indicative conditional statement, it is stated that because the consequent is true, therefore the antecedent is true. Pearson. (2012). It takes on the following form: ISBN 978-0321747471. (2014)

Greeks Mediterranean European populations and principal component analysis (PCA) confirmed the low genetic distance between Greeks and Italians and also revealed Greeks or Hellenes (; Greek: Έλληνες, Éllines ['elines]) are an ethnic group and nation native to Greece, Cyprus, southern Albania, Anatolia, parts of Italy and Egypt, and to a lesser extent, other countries surrounding the Eastern Mediterranean and Black Sea. They also form a significant diaspora (omogenia), with many Greek communities established around the world

Therefore, P. Influence – A publication that has significantly influenced the world or has had a massive impact on the teaching of chemistry. Greek colonies and communities have been historically established on the shores of the Mediterranean Sea and Black Sea, but the Greek people themselves have always been centered on the Aegean and Ionian seas, where the Greek language has been spoken since the Bronze Age. Until the early 20th century, Greeks were distributed between the Greek peninsula, the western coast of Asia Minor, the Black Sea coast, Cappadocia in central Anatolia... $\therefore Q \rightarrow P$ Topic creator – A publication that created a new topic.
