Hart (1888 – after 1947) was an English bridge player and writer. Austrian bridge player and theorist Paul Stern had (being a Jew and also strongly anti-Nazi) sought refuge in London after Nazi Germany occupied Austria in the 1938 Anschluss. According to the Introduction to the book by English bridge writer Guy Ramsay, Stern had known Darvas in the 1930s and in his exile had become friends with Hart. Stern proposed a book by the two of them, combining the Hungarian's fantasy and wit and the Englishman's fancy and humour. Soviet Russia, which had taken control of Hungary after World War II, considered bridge a decadent game. By devious routes Darvas smuggled out his ideas for bridge deals to Stern, who passed them on to Hart, who wrote the narrative.... 95d77a252a Williams is a graphic designer, typographer, author, college instructor, and lecturer. The name originates from the Basic Input/Output System used in the CP/M operating system in 1975. The BIOS firmware was originally proprietary to the IBM PC; it was reverse engineered by some companies, such as Compaq, Phoenix Technologies, AMI and others, looking to create compatible systems. The interface of that original system serves as a de facto standard. 95d77a252a The game consists of a number of deals, each progressing through four phases. The cards are dealt to the players; then the players call (or bid) in an auction seeking to take the contract, specifying how many tricks the partnership receiving the contract (the declaring side) needs to take to receive points for the deal. During the auction, partners use their bids to exchange information about their hands, including overall strength and distribution of the suits; no other means of conveying or implying any information is permitted. The cards are then played, the declaring side trying to fulfill the contract, and the defenders trying to stop the declaring side from achieving its goal. The deal is scored based on the number of tricks taken, the contract, and various other factors which depend to some extent on the variation of the game being played. 95d77a252a

BIOS legacy BIOS firmware is Windows 10 as Windows 11 requires a UEFI-compliant system (except for IoT Enterprise editions of Windows 11 since version 24H2) In computing, BIOS or the Basic Input/Output System is a type of firmware used to provide runtime services for operating systems and programs and to perform hardware initialization during the booting process (power-on startup). On a computer using BIOS firmware, the firmware comes pre-installed on the computer's motherboard 95d77a252a

Williams was born in Berkeley, California. She grew up in San Jose and Fremont, California and graduated from Washington High School in Fremont. After high school, she worked in hospitals and then traveled to Europe for two years. She moved to Santa Rosa, California to attend a graphic design program at Santa Rosa Junior College, and began teaching graphic design at the college in 1981. In 2011, she received an MA degree from Brunel University, London, in Shakespeare Authorship studies, and in 2014 she completed a doctoral dissertation for the same university; her doctorate is on the history (and future) of reading Shakespeare – out loud and in community, with an emphasis on editorial practice. 95d77a252a == Early years == 95d77a252a Excel forms part of the Microsoft 365 and Microsoft Office suites of software and has been developed since 1985. 95d77a252a The BIOS in older PCs initializes and tests the system hardware components (power-on self-test or POST for short), and loads a boot loader from a mass storage device which then initializes a kernel. In the era of DOS, the BIOS provided BIOS interrupt calls for the keyboard, display, storage, and other input/output (I/O) devices that standardized an interface to application programs and the operating system. More recent operating systems do not use the BIOS interrupt calls after startup. 95d77a252a == Development == 95d77a252a
