Derivatives can be used to insure against price movements (hedging), increase exposure to price movements for speculation, or get access to otherwise hard-to-trade assets or markets. Most derivatives are price guarantees. Some derivatives are based on the occurrence of specific events or measurable outcomes rather than directly on market prices. Agricultural and energy companies use derivatives to hedge risks such as weather conditions and commodity price fluctuations. Derivatives can be used to protect lenders... 97207c9b77
