Wikipedia:Language learning centre/Word list A big list will constantly show you what words you don't know and what you need to work on and is useful for testing yourself. You can use the list to generate your own lists in whatever language you're learning and to test yourself. transformation transformational transformations transformative transformed

transformer transformers transforming transforms transfused transfusing transfusion transfusions Drawing up a comprehensive list of words in English is important as a reference when learning a language as it will show the equivalent words you need to learn in the other language to achieve fluency. Eventually these words will all be translated into big lists in many different languages and using the words in phrase contexts as a resource e3686d3897

Deep learning networks, convolutional neural networks, generative adversarial networks, transformers, and neural radiance fields. The adjective "deep" refers to the use of multiple layers (ranging from three to several hundred or thousands) in the network. Methods used can be supervised, semi-supervised or unsupervised. The field takes inspiration from biological neuroscience and is centered around stacking artificial neurons into layers and "training" them to process data. These architectures have been applied to In machine learning, deep learning focuses on utilizing multilayered neural networks to perform tasks such as classification, regression, and representation learning e3686d3897
