

The Scientification Of Love

Sternberg says that intimacy refers to "feelings of closeness, connectedness, and bondedness in loving relationships," passion refers to "the drives that lead to romance, physical attraction, sexual consummation, and related phenomena in loving relationships" and decision/commitment means different things in the short and long term. In the short-term, it refers to "the decision that one loves a certain other", and in the long-term, it refers to "one's commitment to maintain that love."

7267415073 People who experience little to no romantic attraction are referred to as aromantic. 7267415073 Love is considered to be both positive and negative, with its virtue representing kindness, compassion, and affection—"the unselfish, loyal, and benevolent concern for the good of another"—and its vice representing a moral flaw akin to vanity, selfishness, amour-propre, and egotism. It may also describe compassionate and affectionate actions... 7267415073 The Greek term theophilia means the love or favour of God, and theophilos means friend of God, originally in the sense of being loved by God or loved by the gods; but is today sometimes understood in the sense of showing love for God. 7267415073

Biology of romantic love The biology of romantic love has been explored by such biological sciences as evolutionary psychology, evolutionary biology, anthropology and neuroscience The biology of romantic love has been explored by such biological sciences as evolutionary psychology, evolutionary biology, anthropology and neuroscience. Neurochemicals and hormones such as dopamine and oxytocin are studied along with a variety of interrelated brain systems which produce the psychological experience and behaviors of romantic love 7267415073
