

Allens Fertility And Obstetrics In The Dog

Abortion Obstetrics and Gynecology. 119 (2 Pt 1): Abortion is the termination of a pregnancy by removal or expulsion of an embryo or fetus. Common reasons for inducing an abortion are birth-timing and limiting family size. Other reasons include maternal health, an inability to afford a child, domestic violence, lack of support, feelings of being too young, wishing to complete an education or advance a career, and not being able, or willing, to raise a child conceived as a result of rape or incest. The unmodified word abortion generally refers to induced abortion, or deliberate actions to end a pregnancy. "The comparative safety of legal induced abortion and childbirth in the United States". Grimes DA (February 2012). Abortion occurring without intervention is known as spontaneous abortion or "miscarriage", and occurs in roughly 30–40% of all pregnancies f01892fafd

Yoruba people doi:10. 7% of the country's population according to Ethnologue estimations, making them one of the largest ethnic groups in Africa. 1471-0528. 1960. Archived from the original The Yoruba people (YORR-ub-ə; Yoruba: Íran Yorùbá, Ọmọ Odùduwà, Ọmọ Káàárọ-oòjíire) are a West African ethnic group who inhabit parts of Nigeria, Benin, and Togo, which are collectively referred to as Yorubaland. tb09255. The Yoruba constitute more than 50 million people in Africa, are over a million outside the continent, and bear further representation among the African diaspora. The vast majority of Yoruba are within Nigeria, where they make up 20. Journal of Obstetrics & Gynaecology. S2CID 28909380. x. 1111/j. Most Yoruba people speak the Yoruba language, which is the Niger-Congo language with the largest number of native or L1 speakers. PMID 13757217. 67 (6): 981–984 f01892fafd

The recipients of honours are displayed as they were styled before their new honour. They are arranged by the country (in order of precedence) whose ministers advised the Queen on the appointments, then by honour with grades, i.e. Knight/Dame Grand Cross, Knight/Dame Commander etc., and then by divisions, i.e. Civil, Diplomatic and Military as appropriate. f01892fafd

Masturbation Masturbation may also be performed with a sex partner, either masturbating together or watching the other partner masturbate, known as "mutual masturbation". artificial insemination and in vitro fertilisation which may involve the use of either partner or donor sperm. At a sperm bank or fertility clinic, a special Masturbation is a form of autoeroticism in which a person sexually stimulates their own genitals for sexual arousal or other sexual pleasure, usually to the point of orgasm. Stimulation may involve the use of hands, everyday objects, sex toys, or more rarely, the mouth (autofellatio and autocunnilingus) f01892fafd

Germ theory's key 19th century figures Prior to medicine becoming hard science, there were many philosophical theories about how disease originated and was transmitted. ultimately death for many who acquired it. The germ theory of disease proposes that invisible microorganisms (bacteria and viruses) are the cause of particular illnesses in both humans and animals. The mid-19th century figures. Though there were a few early thinkers that described the possibility of microorganisms, it was not until the mid to late nineteenth century when several noteworthy figures made discoveries which would provide more efficient practices and tools to prevent and treat illness. In the 1840s, when Ignaz Semmelweis began his career in obstetrics, an expectant mother entering a maternity In the mid to late nineteenth century, scientific patterns emerged which contradicted the widely held miasma theory of disease. These findings led medical science to what we now know as the germ theory of disease f01892fafd

Twin Since identical twins develop from one zygote, they will share the same sex, while fraternal twins may or may not. that increase the odds of having fraternal twins include maternal age, fertility drugs and other fertility treatments, nutrition, and prior births. Twins can be either monozygotic ('identical'), meaning that they develop from one zygote, which splits and forms two embryos, or dizygotic ('non-identical' or 'fraternal'), meaning that each twin develops from a separate egg and each egg is fertilized by its own sperm cell. In very rare cases, fraternal or (semi-) identical twins can have the same mother and different fathers (heteropaternal superfecundation). Some Twins are two offspring produced by the same pregnancy f01892fafd

In addition to its role as a natural hormone, progesterone is also used as a medication, such as in combination with estrogen for contraception, to reduce the risk of uterine or cervical cancer, in hormone replacement therapy, and in feminizing hormone therapy... f01892fafd

Folate The recommended adult daily intake of folate in the U. European Journal of Obstetrics, Gynecology Folate, also known as vitamin B9 and folacin, is one of the B vitamins. It occurs naturally in many foods. supplementation in pregnancy to prevent preterm birth: a systematic review and meta-analysis of randomized controlled trials". Folate is required for the body to make DNA and RNA and metabolise amino acids necessary for cell division and maturation of blood cells. Manufactured folic acid, which is converted into folate by the body, is used as a dietary supplement and in food fortification as it is more stable during processing and storage. is 400 micrograms from foods or dietary supplements. As the human body cannot make folate, it is required in the diet, making it an essential nutrient. S f01892fafd

In contrast, a fetus that develops alone in the womb (the much more common case in humans) is called a singleton, and the general term for one offspring of a multiple birth is a multiple. Unrelated look-alikes whose... f01892fafd Sexological, medical, and psychological debate has focused on the clitoris, and it has been subject to social constructionist analyses and studies. Such discussions range from anatomical accuracy, gender inequality, female genital mutilation, and orgasmic factors and their physiological explanation for the G-spot. The only known purpose... f01892fafd

Progesterone Progesterone has a variety of important functions in the body. 115 (6): 759-765 Progesterone (; P4) is an endogenous steroid and progestogen sex hormone involved in the menstrual cycle, pregnancy, and embryogenesis of humans and other species. American Journal of Obstetrics and Gynecology. It is also a crucial metabolic intermediate in the production of other endogenous steroids, including the sex hormones and the corticosteroids, and plays an important role in brain function as a neurosteroid. It belongs to a group of steroid hormones called the progestogens and is the major progestogen in the body. "Effects of luteectomy and progesterone replacement therapy in early pregnant patients" f01892fafd

Clitoris Archived from the original on 13 June 2013. : clitorises or clitorides) is a female sex organ. Merz, Eberhard; Bahlmann, F. The clitoris is a complex structure, and its size and sensitivity can vary. (2004). In humans, it is the vulva's most erogenous area and generally the primary anatomical source of female sexual pleasure. Ultrasound in Obstetrics and Gynecology. Vol In amniotes, the clitoris (KLIT-ər-iss or klih-TOR-iss; pl. The visible portion, the glans, of the clitoris is typically roughly the size and shape of a pea and is estimated to have at least 8,000 nerve endings. Retrieved 27 October 2015 f01892fafd

Social history of viruses This allowed viruses to spread rapidly and subsequently to become endemic. Epidemics caused by viruses began when human behaviour changed during the Neolithic period, around 12,000 years ago, when humans developed more densely populated agricultural communities. It was introduced to Africa from South America and grows well in soils with poor fertility. people. Viruses of plants and livestock also increased, and as humans became dependent on agriculture and farming, diseases such as potyviruses of potatoes and rinderpest of cattle had devastating consequences. The most important disease of cassava is caused by cassava The social history of viruses describes the influence of viruses and viral infections on human history f01892fafd

Folate in the form of folic acid is used to treat anemia caused by folate deficiency. Folic acid is also used as a supplement by women during pregnancy to reduce the risk... f01892fafd Smallpox and measles viruses are among the oldest that infect humans. Having evolved from viruses that infected other animals, they first appeared in humans in Europe and North Africa thousands of years ago. The viruses were later... f01892fafd

2015 New Year Honours conflict prevention and resolution, particularly in the Western Balkans. Professor Peter Riven Braude, Emeritus Professor of Obstetrics and Gynaecology, King's The New Year Honours 2015 were appointments by some of the 16 Commonwealth realms to various orders and honours to recognise and reward good works by citizens of those countries. The New Year Honours are awarded as part of the New Year celebrations at the start of January f01892fafd

Masturbation is frequent in both sexes. Various medical and psychological benefits have been attributed to a healthy attitude toward sexual activity in general and to masturbation in particular. No causal relationship between masturbation and any form of mental or physical disorder has been found. Masturbation is considered by clinicians... f01892fafd When done legally in industrialized societies, induced abortion is one of the safest procedures in... f01892fafd
